

Workshop excerpt taken from the live webinar

Coediting: Real-Time Design Collaboration Using Adobe XD

Learn to collaborate over an interactive prototype with your colleagues, clients, and developer with the one-of-a-kind sharing tools built-in to Adobe XD and Creative Cloud.

1. Download the following asset

Download the following asset and save it to the computer where you have Adobe XD installed.

XD Project: [Trailhike App...](#) by Codify Design Studio

2. Preview the prototype

Switch to the Prototype workspace and select the blue dotted box on the first artboard, and then:

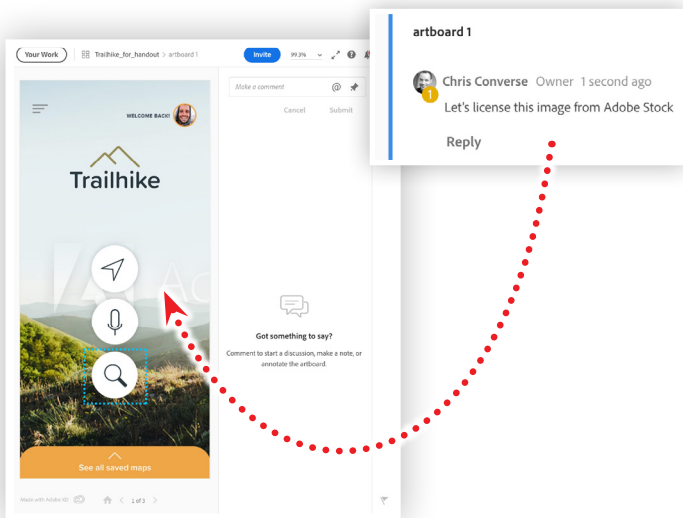

- Note the blue arrow linking to the second artboard
- Note the interaction settings
 - Trigger: **Action**
 - Type: **Transition**
 - Animation: **Slide Left**
- Click the play ► button in the top left to Preview the prototype

3. Creating share links

Switch to the Share workspace and click the Create Link button in the Link Settings panel.

- Choose Design Review for the View Setting
- Use the Link Access option to allow Anyone with the link to view

4. Open review URL in a web browser

Click the hyperlink in the link field to open the Design Review in a web browser. Click the Pin icon in the Comment field, then:

- Move your cursor (which contains a numbered icon) to an area of the design that you'd like to comment on
- Click to apply a note to the design
- Type in your message then click Submit
- Use the @ symbol to mention another reviewer in your comment
- Navigate between artboards by clicking on the blue dotted boxes (*make use of the interactivity built into the prototype*)
- Use the Invite button to add more reviewers to your prototype

St Make it with Adobe Stock.

Watch the webinar recording
