

Workshop excerpt taken from the live webinar

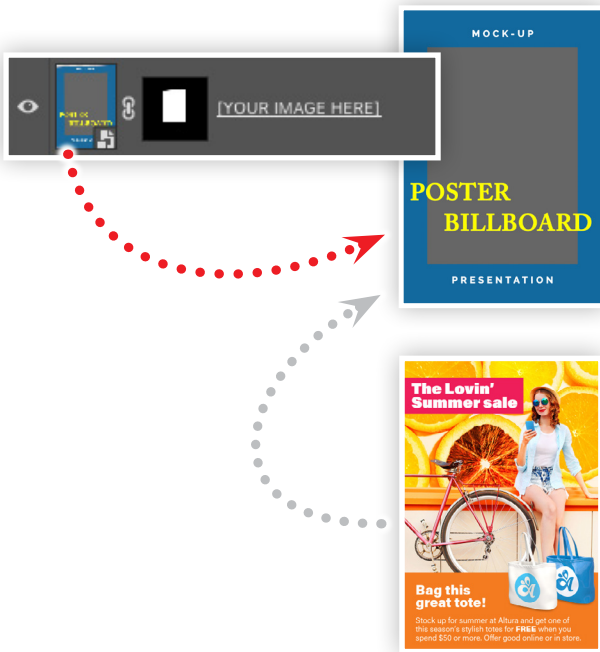

Enhance Your Portfolio with Unique Projects and Adobe Stock

Combine images together from Adobe Stock to create an entirely new image for your design projects. Give these Photoshop techniques a try for yourself.

1. Download FREE template from Adobe Stock

[Street Billboard Mockup](#) by Graphic Burger
[Sample poster](#) by Codify Design Studio

2. Open the street billboard template

Open the Photoshop template (#121688022).

- Locate the layer [YOUR IMAGE HERE]
- Double click to open the Smart Object

3. Place the poster image into the Smart Object

Choose Place Linked from the File menu and locate the poster image.

- Position the poster layer at the top
- Hide the Placeholder Layer Group
- Scale and position the poster Smart Object to fit the canvas
- Save and close the Smart Object file

4. Add Brightness/Contrast adjustment layer

Select the Reflection layer, then select the adjustment icon and choose Brightness/Contrast.

- The adjustment layer is above the Reflection layer
- Set Brightness to 0
- Set Contrast to -10
