Getting Started With Adobe Portfolio

Structuring your portfolio

The main content structure of a portfolio is broken into galleries, pages, albums, and links.

- **Galleries:** Galleries are a collection of pages and Lightroom Albums. Simply put, galleries are the primary containers for your content. They can be used to group related pieces together.
- **Pages:** Pages typically exist as part of a gallery, and usually contain information about one specific piece of content. Pages are used for sharing information such as contact information, an artist statement, or a bio.
- **Albums:** Albums are Lightroom Collections, which allow you to organize your images into different categories. Albums are often used to showcase a variety of images related to a specific theme or project.
- **Links:** Links can be used to direct visitors to other websites or web pages. This is a great way to provide more information or to share additional content.

Adding content to a page

To create a new page, follow these steps:

1. Click the plus sign in the left sidebar, then choose a gallery from the drop-down menu.
2. In the Manage Content panel, click the plus button to add a new page.
3. Name your new page and choose a gallery from the destination dropdown menu, then click Create Page.

Managing your content and navigation

You can access Adobe Portfolio directly from the Adobe Creative Cloud e-learning series:

- **Adobe Creative Cloud e-learning series:** Join Chris Converse in the recorded webinar to learn how to:
  - Incorporate great type
  - Add photo albums from Lightroom
  - Connect to content from Basecamp
  - Password-protect pages or the entire site
  - Preview your work on different devices

The main navigation menu is composed of three items:

- **Home:** This page provides a quick overview of your portfolio, displaying all galleries, pages, albums, and links. You can click on any of these items to navigate to that section of your portfolio.
- **Manage Content:** This panel allows you to visually rearrange your content by simply dragging and dropping elements to new positions. Add or remove pages from one gallery to another by dragging them around, or rearrange the order of entire galleries.
- **Manage Navigation:** The navigation for your site is also determined by the structure of the Manage Content panel. Any item that appears in the most-left position is treated as top-level items in the navigation. The best part about this panel is that you can visually rearrange your content by simply dragging and dropping elements to new positions. Add or remove pages from one gallery to another by dragging them around, or rearrange the order of entire galleries.

The navigation for your site is also determined by the structure of the Manage Content panel. Any item that appears in the most-left position is treated as top-level items in the navigation. The best part about this panel is that you can visually rearrange your content by simply dragging and dropping elements to new positions. Add or remove pages from one gallery to another by dragging them around, or rearrange the order of entire galleries.

The Manage Content button, in the left sidebar, gives you an overview of the content in your portfolio site. All galleries, pages, albums, and links show in this panel, and are graphically represented based on their hierarchy.

Adding content to a page

To create a new page, follow these steps:

1. Click the plus sign in the left sidebar, then choose a gallery from the drop-down menu.
2. In the Manage Content panel, click the plus button again to add another page.
3. This page is empty at first. To add content, and this time create a page. Name your new page and choose a gallery from the destination dropdown menu, then click Create Page.
4. The Manage Content panel will open, displaying your empty gallery. Click the plus button again to add another page.
5. This page is empty at first. To add content, drag and drop an album or image from your library into the gallery area.
6. Add a title, description, and keywords for your page to help visitors find it.
7. Click Publish to make your page live.

Adding content to a gallery

To add content to a gallery, follow these steps:

1. Click the plus sign in the left sidebar, then choose a gallery from the drop-down menu.
2. In the Manage Content panel, click the plus button again to add another page.
3. This page is empty at first. To add content, drag and drop an album or image from your library into the gallery area.
4. Add a title, description, and keywords for your page to help visitors find it.
5. Click Publish to make your page live.
