

Workshop excerpt taken from the live webinar

Shoot, Edit, Publish your Photos with Creative Cloud

Make adjustments to your images, anywhere, with just your fingers. Explore the amazing features of Lightroom on your mobile device to bring out the best in your images.

1. Download the following assets

Download the following preview image from Adobe Stock, then save it to your synced Creative Cloud files folder:

Adobe Stock image: [Insect beetle macro](#) by Murilo

2. Open the image in Lightroom on your mobile device

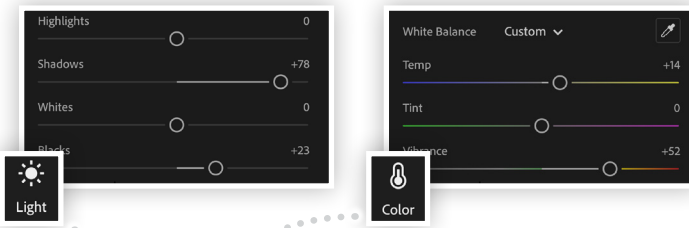

You can access images from a variety of locations when using the mobile version of Lightroom. Launch Lightroom on your mobile device, then:

- Tap the Add Image button
- Choose From Files, then Browse (to reveal more locations)
- Choose Creative Cloud
- Tap on the Adobe Stock image

3. Bring out the details in the main subject

Use the lighting tools to bring out details in the dark areas of the image. Use both the Light and Color tools to make the following adjustments:

- **Light** — Shadows: 78
Blacks: 23
- **Color** — Temperature: 14
Vibrance: 52

4. Zoom up on the image for finer control

Pinch open on the image to zoom in while you are editing in Lightroom. Switch to the Detail tool and adjust the following:

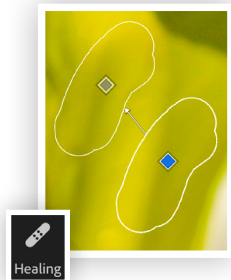

- **Detail** — Sharpening: 39
Radius: 1.2
Detail: 36

5. Make quick touch-ups with Spot Healing

Edit parts of the image quickly using the spot healing brush. Select the Healing tool and make the following adjustments:

- Zoom in on the image to reveal the hole in the leaf
- Tap on the soft-edge brush
- Paint over the hole in the leaf
- Drag the source area around to find a better match for the area being healed
