

Workshop excerpt taken from the live webinar

Show Off Your Design Work in the Real World

Learn to mock-up your design work with real world templates from Adobe Stock. Try this workflow for yourself with a Photoshop template.

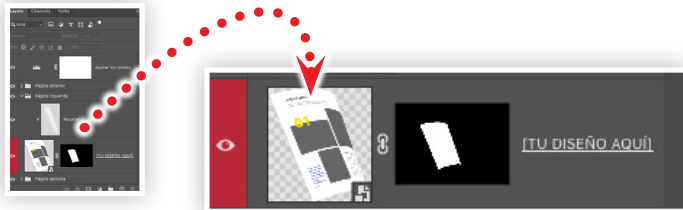

1. Download the design assets

Download the following template from Adobe Stock and a sample PDF.

Template: [Maqueta de revista](#) by [Graphic Burger](#)

Data file: [Altura Financial Booklet](#) by [Codify Design Studio](#)

2. Edit the Embedded Smart Object in the PSDT file

This template contains three Smart Objects that are mapped to pages in the magazine image.

- Open the Photoshop template, then locate the Layers panel
- Locate the middle Layer Group named *Página derecha (Right page)*
- Open the Smart Object named [Tu diseño aquí] (*Your design here*)

3. Import a PDF page into the Smart Object

With the Smart Object open, choose Place Linked from the file menu, locate the *Altura Financial Booklet.pdf*, then click Place.

- From the page selection dialog box, choose page 13
- Scale the artwork up to match the size of the canvas
- Position the layer at the top of the Layers panel
- Create a new layer under the placed PDF page, and fill it with white
- Close and save the Smart Object

4. Import more PDF pages into the template

Open the Smart Object named [Tu diseño aquí] (*Your design here*) in the bottom Layer Group named *Página izquierda (Left page)*.

- Choose Placed Linked from the File menu
- Choose page 12 from the page selection dialog box
- Position the layer at the top of the Layers panel
- Close and save the Smart Object

Watch the webinar recording

Watch *Show Off Your Design Work in the Real World* in its entirety from the [Creative Cloud Events](#) page.

St Make it with Adobe Stock.
