Workshop excerpt taken from the live webinar

Showcase your data with Adobe Stock Motion Graphic Templates

Represent your data in a more influential way by adding motion and design with a Motion Graphic Template from Adobe Stock. Try this Premiere Pro workflow for yourself.

1. Download assets from Adobe Stock

Download the following video and template from Adobe Stock.
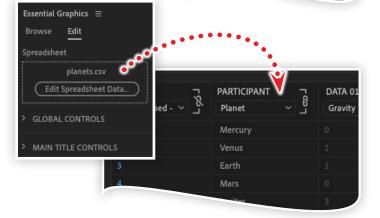

Video: [Solar System Animation](#) *by Noel Powell*
Template: [Data-Driven Leaderboard Infographic](#) *by Flux VFX*
Data file: [Planet Data CSV](#) *by Codify Design Studio*

## 2. Installing the Motion Graphic Template

Open Premiere Pro:
- Choose Install Motion Graphic Template from the Graphics Menu
- Locate the **.mogrt** template file you downloaded from Adobe Stock
- Locate the template in the Essential Graphics panel in Premiere Pro

3. Drag the graphic template into your timeline

Locate the Motion Graphic Template in the Essential Graphics panel and drag it into the Timeline panel
- Select the graphic template layer
- Switch the Essential Graphics panel to the Edit pane
- Locate the *planets.csv* file and drag it into the Spreadsheet area
- Assign the columns as Planet, Gravity, Moons, Day, and Temperature

4. Customize labels and colors

With the Motion Graphic Template layer selected in the Timeline panel, make the following adjustments:
- Change the title in the Main Title Controls
- Change the text in the Header Controls to match the CSV columns
- Lower the opacity for the background and the chart background properties in the Background Controls
