*Workshop excerpt taken from the live webinar*
Sketch, Comp and Finalize a Brochure Layout with Creative Cloud

Quickly explore layout ideas for print, web, mobile, or social on your mobile device with Adobe Comp. Create a layout on the go with Comp and then finish it on your desktop.

1. Download the following assets

Download the following preview images from Adobe Stock and save them to your Creative Cloud files *(or any mobile-accessible location)*:

Adobe Stock image: Woman relaxing... *by Antonioguillem*

Adobe Stock image: Cozy living room... *by New Africa*

2. Create a new project and draw a graphic box

After launching Adobe Comp on your mobile device, tap the plus button to create a new project. Select the Square Preset (600x600), then draw a rectangle with an 'x' in it.

3. Add images into the graphic boxes

Resize the graphic box to fill the width, and about 40% of the height starting from the top. Double-tap the selected graphic box, and then:
- Choose the location of the Adobe Stock images
- Select the Adobe Stock image (#300243277)
- Draw another graphic box and size it to be more square
- Import Adobe Stock image (#189152853)
- Use two fingers to rotate and position and the image

4. Add text boxes and shapes

Next to the rotated image, draw a rectangle with at least two horizontal lines in it in order to create a text box. Resize the text box, and then:
- Tap the text too at the top of the screen, and add a headline
- Double-tap the headline and type "Welcome to your new"
- Set the text to be centered, all caps, white and letter spaced to 230
- Draw a rectangle shape, color it black and set the opacity to 70%
- Position the shape over the top image, aligned at the bottom
- Position the headline over the shape

5. Finish the project on the desktop

When you have your basic layout finished, use the action button at the top of the screen (⬆). Choose the application you'd like to use in order to complete your project.

Once on the desktop, do the following to match the image on the left:
- Set eh page/canvas color to a solid color
- Horizontally flip the small image
- Set another text box with the word 'classroom' set in Chalky font
- Add a call-to-action button

St **Make it with Adobe Stock.**
