“Opionated” Pipeline via Cloud Manager

Diana Munteanu | Software Development Engineer

Demonstrate how a customer is setting up a AEM as a Cloud Service pipeline via Cloud Manager

AEM as a Cloud Service uses Continuous Integration and Continuous Delivery (CI/CD) to ensure that your projects are on the most current AEM version. Production and Stage instances are updated to the latest AEM version without any interruption of service for users.

AEM Sites: A Hybrid CMS - Best of Headless + Traditional Web Delivery
