Experience League Events

Experience League Events are a great place to get answers from product experts at Adobe. Here are the available events:

- [Experience League Live](#): Live and on-demand video events on YouTube
- [Community Q&A Coffee Breaks](#): Chats with Product Managers in Experience League Communities
- [Adobe Developer's Live](#): On-demand video events available on Experience League

Schedules and events are as follows:

Experience League LIVE

[Experience League LIVE](#) is a live streaming show produced by the Experience League team. It's a chance to connect with Adobe product experts. Learn actionable tips, tricks, and strategies you can apply with the Adobe Experience Cloud applications.

Event Date	Time	Event Name	Format	Description
January 25, 2022	9 a.m. (PST)	Analyze your business across data sources	Live Video Event	Use Customer Journey Analytics to bring all your data into one place.
February 3, 2022	12 p.m. (EST)	Introducing all new Reference Demos in AEM	Live Video Event	Learn the fastest way to provision, demo, and explore features of AEM as a Cloud Service.

Past episodes are available at [Experience League Live](#).

Community Q&A Coffee Breaks

Spend an hour with a special guest and submit your questions in Experience League Communities. Get questions answers from product experts at Adobe!

Event Name	Date	Applications	Format	Description
Customer Journey Analytics and the future of Analytics	January 18, 2022 @ 8am PST	Adobe Analytics, Customer Journey Analytics, Experience Platform	Forum Q&A	Post your questions in the Analytics Community for Trevor Paulsen, Group Product Manager, Adobe Analytics. Details and registration

Event Name	Date	Applications	Format	Description
Adobe Target Integration with Journey Optimizer, the Adobe Target interface, and general Target topics	January 19, 2022 @ 9am PST	Adobe Target, Journey Optimizer	Forum Q&A	Spend an hour with Jon Tehero and submit your questions in the Adobe Target Community. Details and registration

Adobe Developer's Live

Event	Date & Time	Type	Description
Adobe Developers Live	On Demand	Video	Developers Live showcases the latest tech advances and developer tools powering design, content creation workflows, document services, and customer experience management across industries. View the keynote address, learn about Analytics APIs, client data layer, Adobe I/O open-source projects, and much more.

Experience Cloud Central UI Components & Administration

Not updated in the past month.

More help resources on Experience Cloud Central UI Components & Administration

- Administration help for [Central Interface Components](#) and user management

Adobe System Status

Adobe System Status provides detailed information, status updates, and email notifications about Adobe products and services outage, disruption, and maintenance events. Check it out at status.adobe.com.

Read the [latest release notes](#) for Adobe System Status.

Adobe Experience Platform

Release update information and new documentation for Experience Platform and Mobile SDK:

- Release: **January 26, 2022**

See [Experience Platform release notes](#) to read the latest.

New Experience Platform tutorials and courses

New videos, tutorials, or courses published for Experience Platform.

Published	Name	Type	Description
January 2022	Configure Customer AI	Video	Learn how to create an instance of Customer AI to predict customer behavior.
January 2022	Configure Attribution AI	Video	Learn how to create an instance of Attribution AI to understand the impact of your marketing channels and campaigns.

Adobe Mobile SDK

See [Release notes and change logs](#) for the Adobe Experience Platform Mobile SDKs.

Adobe Analytics

Release date: **January 19, 2022**

- [New features in Adobe Analytics](#)
- [Fixes in Adobe Analytics](#)
- [Important notices for Analytics administrators](#)
- [Analytics courses and tutorials](#)
- [AppMeasurement](#)

New features in Adobe Analytics

Feature	Description	Targeted Date
N/A		See General Availability .

Fixes in Adobe Analytics and Customer Journey Analytics

- Fixed an Analysis Workspace issue where the Audience ID was missing from dimension items. (AN-262038; AN-279315)
- Fixed an issue that prevented users from loading a saved Target project in Workspace. (AN-277461; AN-275825; AN-266397)
- Fixed an issue where non-enabled features are visible in the UI. (AN-262006)
- Fixed an issue that occurred when changing the date using the date field in Workspace. This resulted in the End Time changing from 11:59 PM to 12:00 AM. (AN-277269; AN-277481)
- Fixed an issue that caused the Segment UI to break when adding new segments into an already loaded segment. (AN-260827)
- Fixed an issue with users being unable to access shared Workspace projects. (AN-267529)
- Added an error message that shows when a rolling date range has a start date later than the end date. (AN-270488)
- Fixed various data feeds issues. (AN-275876; AN-270512; AN-277284; AN-277290; AN-274893; AN-274606; AN-269651)
- Fixed an issue with date ranges in graphs ignoring date filters in tables. (AN-263999)

- Fixed an issue with scheduled reports getting sent early due to Daylight Savings Time. (AN-276410; AN-276305)
- Fixed an issue with project download to .csv file failing in Workspace. (AN-275834)

Additional fixes in Adobe Analytics

AN-253294; AN-254976; AN-255377; AN-255561; AN-258550; AN-259336; AN-263935; AN-265094; AN-269441; AN-269486; AN-269855; AN-271166; AN-271588; AN-272088; AN-272249; AN-272859; AN-272873; AN-272885; AN-273229; AN-273913; AN-274237; AN-274472; AN-274491; AN-274619; AN-274766; AN-275248; AN-275259; AN-275271; AN-275315; AN-275388; AN-275418; AN-275597; AN-275643; AN-275650; AN-275651; AN-275675; AN-275682; AN-275704; AN-275711; AN-275796; AN-275834; AN-275923; AN-275941; AN-276044; AN-276125; AN-276157; AN-276397; AN-276597; AN-276789; AN-276834; AN-276861; AN-276870; AN-276963; AN-276975; AN-277000; AN-277044; AN-277093; AN-277200; AN-277215; AN-277271; AN-277281; AN-277362; AN-277419; AN-277492; AN-277498; AN-277533; AN-277619; AN-277675; AN-277681; AN-277767; AN-277805; AN-277810; AN-277818; AN-277875; AN-277933; AN-277988; AN-278105; AN-278115; AN-278122; AN-278192; AN-278407; AN-278437; AN-278559; AN-278604; AN-278610; AN-278709; AN-278835; AN-278849; AN-278881; AN-279067; AN-279103; AN-279111; AN-279219; AN-279237; AN-279312

Important notices for Analytics administrators

Notice	Date Added or Updated	Description
Expiration of allowlist EOL extension for legacy Analytics OAuth/JWT integrations	January 14, 2022	<p>On May 25, 2022, the Analytics 1.3 API, 1.4 SOAP API, and Legacy Analytics OAuth/JWT EOL allowlist extension will expire. It was offered to provide customers using legacy Adobe Analytics OAuth/JWT credentials additional time to migrate their client integrations to Adobe IMS credentials. This expiration affects (but is not limited to) Adobe Analytics Livestream and Adobe Campaign customers who have not completed their required IMS migrations. Customers who are currently using legacy Analytics OAuth/JWT credentials via the allowlist extension and who do not complete their migration to IMS credentials by May 25, 2022 will lose access to Adobe services. Livestream customers can refer to these instructions on migrating their client applications to IMS credentials. Campaign customers can reach out to their Adobe account team about upgrading to the latest version of Campaign.</p>
EOL for Reports & Analytics	January 4, 2022	<p>Effective December 31, 2023, Adobe intends to discontinue Reports & Analytics and its accompanying reports and features. The reports, visualizations, and underlying technology that power Reports & Analytics no longer meet Adobe's technology standards. Most Reports & Analytics features are available in Analysis Workspace. Since the release of Analysis Workspace in 2015, Reports & Analytics functionality and capabilities have been moved to Analysis Workspace and a threshold of workflow parity has been reached. This notice explains the end-of-life process.</p>

Notice	Date Added or Updated	Description
Secure File Transfer Protocol (SFTP) services upgrade	January 13, 2022	On May 2, 2022 , Adobe Analytics will upgrade its Secure File Transfer Protocol (SFTP) services in order to provide improved security for file transfers. With this change, some SFTP client configurations will no longer be supported. We will also add some connection options which will be available by March 1, 2022 . This will only impact data sent to or retrieved from Adobe Analytics using SFTP. The FTP protocol will not be impacted. In order to avoid service disruptions, please ensure that your SFTP clients (code, tools, services) will be in accordance with the changes detailed here .
<i>Global + China</i> RDC Type	November 22, 2021	<i>Global + China</i> is a new Regional Data Collection (RDC) type that simplifies routing of traffic for global customers using the China Performance Optimization Add-On Package. In the past, you had to determine whether data should be routed to the China collection endpoint or one of the Global collection endpoints. Now you can choose this RDC <i>type</i> to let Adobe determine the optimal collection endpoint based on the geolocation of the user.
EOL for Full Processing in Data Sources	October 18, 2021	On January 31, 2022 , Adobe will end of life Full Processing, which enables users to ingest offline hit data into Analytics. This capability is available via Bulk Data Insertion API . Learn more

AppMeasurement

For the latest updates on AppMeasurement releases (Version 2.22.4), please refer to [AppMeasurement for JavaScript release notes](#).

New Analytics tutorials and courses

New videos, tutorials, or courses published for Adobe Analytics.

Published	Name	Type	Description
January 2022	<u>Analytics Fundamentals for Business Users has been retired</u>	Video	Learn why the original course was retired and about the new replacement courses Adobe recommends.
January 2022	<u>Media Playback Time Spent Panel</u>	Video	Learn how the Media Playback Time Spent Panel enables media users to understand their viewership by the amount of time viewed during the day over a chosen granularity.
January 2022	<u>Customer Segmentation Strategies & Best Practices In Adobe Analytics</u>	Video	Join the analytics insiders for an Analytics Thursday focused on customer segmentation basics, strategies, and best practices.
January 2022	<u>Configure Paid Search Detection</u>	Video	Learn how to walk through the configuration of the Paid Search Detection section in the Adobe Analytics Admin Console, including some recommendations.
January 2022	<u>Configuring List Variables</u>	Video	Learn how and why you configure and use list variables in Adobe Analytics. List variables enable you to put more than one value into an eVar.
January 2022	<u>Configuring Traffic Variables (props)</u>	Video	Learn about configuration of traffic variables, also known as <i>props</i> , in the Analytics Admin Console.

Published	Name	Type	Description
January 2022	Manipulating incoming data with Processing Rules	Video	Learn about Processing Rules in Adobe Analytics and what you can use them for. Get a few tips, examples, and even a warning about using Processing Rules.
January 2022	Using Segments as Dimensions in Analysis Workspace	Updated video	Learn how to compare and visualize segments by using them as a dimension in Analysis Workspace.
January 2022	Segment Management and Sharing in Adobe Analytics	Updated video	In this updated video, learn some tips for sharing and managing your segments.
January 2022	Using segments to limit data in Analysis Workspace	Updated video	Learn how you can limit users of a project in Analysis Workspace to a specific segment (or segments) as they are working with the tool.
January 2022	Segment Comparison in Analysis Workspace	Updated video	Learn how Segment IQ, part of Analysis Workspace in Adobe Analytics, simplifies analysis by examining any two Analytics segments across all of your dimensions and metrics to automatically discover their most statistically significant differences.

Analytics help resources

- [Adobe Analytics Product Documentation and Tutorials](#)

Customer Journey Analytics

- [New features in Customer Journey Analytics](#)

Release Date: **January 19, 2022**

New features in Customer Journey Analytics

Feature	Description	Targeted Date
Persistence options for binding dimensions and binding metrics	When creating or editing a data view, you can bind the persistence of a dimension to another dimension or metric. This concept is known as <i>merchandising</i> in Reports & Analytics, and is now supported in CJA. Learn more	January 19, 2022
First Known and Last Known allocation models	These two new allocation models take the first or last observed value for a dimension within a specified persistence scope (session, person, or custom time period with look-back.) Then they apply the allocation model to all events within the specified scope. Learn more	January 19, 2022
PersonID and PersonID namespace as dimensions	Exposes the personID (or customerID, or whatever ID you are using for merging data sets in a connection) as a dimension in data views. This enhancement makes it easier for you to include the personID as a dimension in your data view by pulling it in from the connection. Learn more	January 19, 2022

See [General Availability](#) for release information.

Analytics help resources

- [Customer Journey Analytics Product Documentation](#)

Audience Manager

Fixes and improvements in Audience Manager.

- Resolved an issue causing all API calls to return an Undocumented error when being performed through the Swagger interface. (AAM-59190)

- Resolved an issue causing incorrect user roles to be assigned to partners in some situations. (AAM-59451)
- Resolved an issue causing the API to require case-sensitive authentication headers. (AAM-58528)

Adobe Experience Manager

Adobe recommends visiting the [Experience Manager release updates and roadmaps](#) page to stay current on release information.

Experience Manager product releases

- **Experience Manager as a Cloud Service**

Watch the [December 2021 Release Overview video](#) for a summary of the features added in the 2021.11.0 (November 2021) release.

- [October 2021 Release Overview video](#) of new features.
- [September 2021 Release Overview video](#) of new features.
- **Experience Manager Assets as a Cloud Service**

New feature

- Dynamic Media Image Smart Crop and Swatch is now powered by latest Sensei services, which generates improved crops and swatches. Also, an enhancement has been launched to generate different crop content for same aspect ratio but across different resolutions. In addition, any manual edits are preserved on reprocessing if there is no change in the width and height in the Image Profile.

New features in Experience Manager Assets prerelease channel

- Dynamic Media - You can now use Experience Manager Dynamic Media interface to configure General Settings and Publish Setup instead of having to go through the Dynamic Media Classic desktop application.
- Dynamic Media now supports ingestion, preview, playback, and publish for MXF videos. Annotation and shoppable video for MXF videos is not yet supported.
- After configuring a connection between remote DAM and Sites deployments, the assets on remote DAM are made available on the Sites deployment. You can now perform the [update, delete, rename, and move operations](#) on remote DAM assets or

folders. The updates, with some delay, are available automatically on the Sites deployment.

- **Experience Manager Forms as a Cloud Service**

New feature

- **Externalize Experience Manager Workflow data for secure processing:** You can store in-process Experience Manager Workflows data (Experience Manager Workflow Variables data) that contains SPD (Sensitive Personal Data) elements in a customer-managed repository for secure processing. The data elements and workflow variables are not stored in Experience Manager repository and are fetched on demand from a customer-managed repository while processing the Workflow.

New features in Experience Manager Forms prerelease channel

- **AEM Forms as a Cloud Service - Communications:** Communication APIs help you combine a template and XML data to generate print documents in various formats. With the service, you can generate documents in synchronous and batch modes. The APIs let you create applications to do the following:
 - Generate documents by populating template files (PDF and XDP) with XML data.
 - Generate output forms in various formats, including non-interactive PDF print streams.
- **Custom fonts for Document of Record and PDF documents created with Communications APIs:** You can now use brand approved fonts in PDF documents generated using Communications APIs to align with your organizational requirements.
- **Forms Portal:** You can use Forms Portal to list your published adaptive forms on an Experience Manager Sites page. It helps a site visitor discover all available forms. Moreover, the visitor can use Forms Portal to save and access draft of an adaptive form and look at the PDF version of a submitted adaptive form.

- **Cloud Manager**

New features

- Users can now use new Front End Pipelines to exclusively deploy front-end code in an accelerated manner. See Cloud Manager Front End Pipelines to learn more.

IMPORTANT

You must be on Experience Manager version 2021.10.5933.20211012T154732Z or higher to use new Front-End Pipelines.

- Code Quality pipeline duration is reduced by performing the code analysis in a more efficient way without the need for building a whole Experience Manager image. This change is rolling out progressively over the coming weeks following the release.
- The Git Commit ID is now displayed in the pipeline run details making it easier to track the code that was built.
- Program Creation is now available by way of the publicly exposed API.
- Environment Creation is now available via publicly exposed API.
- The `x-request-id` response header is now visible in the API Playground on www.adobe.io. This header is useful when submitting customer care issues for troubleshooting.
- A new Activity page is available where activities like pipeline and code runs can be viewed along with their associated details. Over time, the activities listed in this page expand in scope along with the details provided.
- A new Pipelines page with a status popover for easy view of the summary of details is now available. You can view Pipeline runs along with their associated details.
- The Edit Pipeline API now supports changing the environment used in the deploy phases.
- An optimization in the OakPal scanning process is now available for large packages.
- The quality issue CSV file now contains the timestamp for each quality issue.

Community

- **Experience Manager GEMs Webinar - Experience Manager as a Cloud Service | 2021 review and 2022 outlook**

Date: Tuesday, January 25, 2022

Time: 8:00 A.M. PST or 5:00 P.M. CET or 9:30 P.M. IST

Duration: 60 minutes

Cost: Free!

New Experience Manager courses and tutorials

New videos, tutorials, and courses published over the past month.

Published	Name	Type	Description	Application
January 2022	Extending Adobe Experience Manager as a Cloud Service using Adobe Developer App Builder	Video (multiple)	The new Adobe Developer App Builder provides an extensibility framework for a developer to easily extend AEM as a Cloud Service functionality.	AEM as a Cloud Service
January 2022	AEM Headless quick setup for AEM as a Cloud Service	Video	Have a look at the AEM Headless quick setup. It gets you hands-on with AEM Headless using content from the WKND Site sample project, and a sample React App (a SPA) that consumes the content over AEM Headless GraphQL APIs.	AEM as a Cloud Service

Published	Name	Type	Description	Application
January 2022	<u>Advanced networking</u>	Video (multiple)	Learn how AEM as a Cloud Service provides three options for managing connectivity with external services: Flexible port egress, dedicated egress IP address, and virtual private network. A Cloud Manager program and environments in AEM as a Cloud Service can use only a single type of advanced networking configuration at a time.	AEM as a Cloud Service
January 2022	<u>Enrich Product Data with Associated AEM Content</u>	Video	Learn how marketers can enrich product data with associated content from Adobe Experience Manager. Content, like assets, Experience Fragments, and Content Fragments in AEM can be associated with commerce products.	AEM as a Cloud Service
January 2022	<u>Email service</u>	Video	Send emails from AEM as a Cloud Service by configuring AEM's <code>DefaultMailService</code> to use advanced networking egress ports.	AEM as a Cloud Service
January 2022	<u>Workfront enhanced connector basics</u>	Video	Learn about the basics of the Adobe Workfront and Experience Manager Assets enhanced connector. Also learn about <u>Project folders</u> .	AEM Assets Service and Workfront

Published	Name	Type	Description	Application
January 2022	<u>Getting Started with AEM Sites - Quick Site Creation</u>	Video (multiple)	Learn how to use a low-code approach to create your first site in Adobe Experience Manager with Quick Site Creation and a pre-defined Site Template.	AEM Sites
January 2022	<u>HTTP/HTTPS connections on non-standard ports for flexible port egress</u>	Video (multiple)	Learn how HTTP/HTTPS connections on non-standard ports (not 80/443) must be proxied out of AEM as a Cloud Service.	AEM as a Cloud Service
January 2022	<u>Add icons to indicate active and completed tabs</u>	Video	Learn how to display icons to indicate the status of the tab when you have adaptive form with left tab navigation.	AEM Forms
January 2022	<u>Adobe Asset Link setup</u>	Video	Bring quick impact to your organization, by making it easier for creative and marketing teams to collaborate on assets in the content creation process.	AEM Assets
January 2022	<u>Getting started with AEM Commerce as a Cloud Service</u>	Video	Learn how marketers can enrich product data with associated content from Adobe Experience Manager. Content, like assets, Experience Fragments, and Content Fragments in AEM can be associated with commerce products.	AEM as a Cloud Service

New Adobe Commerce tutorials

Published	Name	Type	Description
January 2022	Business Intelligence	Video (multiple)	Begin with the overview and learn all about Business Intelligence, a complete solution that has been optimized for all Adobe Commerce and Magento Open Source merchants.

Published	Name	Type	Description
January 2022	<u>Users, roles, and permissions</u>	Video	Learn how to create a separate user account for each user and assign restricted access based on their business needs.
January 2022	<u>Two-factor authentication</u>	Video	Learn how two-factor authentication (2FA) prevents unauthorized access to your data. Adobe Commerce and Magento Open Source support two-factor authentication methods from multiple providers.
January 2022	<u>Add websites, stores, and store views</u>	Video	Learn how every Adobe Commerce and Magento Open Source installation supports a hierarchy of websites, stores, and store views. Build and expand this hierarchy according to the needs of your business.
January 2022	<u>Change a store URL</u>	Video	Learn how to change the base URL for your store. (The content in the video reflects the 2.1.0 release.)
January 2022	<u>Set up a store site map</u>	Video	Learn how to easily add a site map to your Commerce store.
January 2022	<u>Promotional price rules</u>	Video	Learn how to set up product relationships and use price rules to trigger discounts based on various conditions.
January 2022	<u>Create a Page</u>	Video	Learn how to create a page that returns JSON with one parameter.
January 2022	<u>Add a JavaScript module</u>	Video	Learn about developing a simple JS module that provides the greeting "Hello World".
January 2022	<u>Page Builder overview</u>	Video	Learn how Page Builder makes it easy to create content-rich pages with custom layouts that enhance your visual storytelling, and drive customer engagement and loyalty.

Published	Name	Type	Description
January 2022	Add a table to a database	Video	Learn about the special mechanism in Commerce that enables you to create database tables, modify existing ones, and add data into them, such as setup data, which has to be added when a module is installed.
January 2022	Create a module	Video	Module is a structural element of Commerce – the whole system is built upon modules. Typically, the first step in creating a customization is building a module.
January 2022	Create a product attribute	Video	Learn how to add a product attribute, which is one of the most popular operations in Commerce. Attributes are a powerful way to solve many practical tasks related to a product.
January 2022	Dependency injection example	Video	Learn about dependency injection, a design pattern that allows an object A to declare its dependencies to an external object B that supplies those dependencies. The dependencies declared by A are usually class interfaces and the dependencies B provides are concrete implementations for those interfaces.

Adobe Target

New features across Advertising Cloud

Last updated: October 27, 2021

Feature	Description
Analytics for Advertising Cloud	If your organization wants to switch from using the legacy Adobe Analytics <code>visitorAPI.js</code> library to the Adobe Experience Platform library (<code>alloy.js</code>) for data collection, you must make some changes to enable ID stitching. See Using the Last Event Service JavaScript Library with Adobe Experience Platform Web SDK .

New features in Advertising Cloud DSP

Last updated: October 27, 2021

Feature	Description
Custom Reports	<p>You can now create and manage Amazon S3 and different types of FTP delivery locations, called <i>report destinations</i>, for your custom reports. Once you configure report destinations, you can set up each of your new custom reports to be delivered to one or more locations of a single destination type, or to email recipients. Updates to your Amazon S3 and FTP credentials won't interrupt report delivery.</p> <p>Your existing reports are still sent to the specified email recipients. To configure delivery to a different report destination, create a report with the new destination.</p>
Packages, Placements, and Ads views	<p>When you view data for a single day, the trend charts now include hourly data. Hold the cursor over any point to see the data for that hour.</p>
Placements	<p>The placement Inspector now includes an Inventory tab, which shows all deals and their associated metrics for the placement. Use the information to make quick adjustments or troubleshoot issues without generating a custom report.</p>
Ads	<p>(Users with permission to include Clearcastclock numbers in their ads) DSP no longer shows an error if you use a clock number that's attached to another ad. Note: The best practice is to use a unique clock number for each video ad. Otherwise, the publisher does not approve all the ads.</p>
Deal IDs	<p>The Deal ID settings and other places in the user interface reflect new branding for Magnite SSP:</p> <ul style="list-style-type: none"> • The SSP Tremor (Telaria) is now Magnite CTV. • In the coming weeks, Rubicon will change to Magnite DV+, where DV+ stands for display, video, and other formats such as audio.

Feature	Description
Freewheel programmatically guaranteed deals	You can now find the status of ads for Freewheel programmatically guaranteed deals from the Ads view. Previously, you could check the status only from the Deals view.

New features in Advertising Cloud Search

Last updated: February 4, 2022

Feature	Description
Bulksheets, Notification Center	<p>(January 22 release) All email notifications for bulksheets, which Advertising Cloud Search sends when a bulksheet operation completed or failed, are now handled by Notification Center.</p> <p>Bulksheets is a new notification type, with its own notification preferences, in Notification Center. Email notifications and web notifications are enabled by default, but you can optionally change the notification settings.</p> <p>The format and contents of email notifications uses the Notification Center template and includes a direct download link for the associated bulksheet file or error file.</p>

Experience League Events

Experience League Events are a great place to get answers from product experts at Adobe. Three types of events include:

Event Type	Description
Experience League LIVE	A live streaming show produced by the Experience League team and hosted on YouTube. It's a chance to connect with Adobe product experts. Learn actionable tips, tricks, and strategies you can apply with the Adobe Experience Cloud applications. Scroll down to learn more about upcoming events and watch past events hosted on Experience League Live .
Community Q&A Coffee Breaks	Spend an hour with a special guest and submit your questions in Experience League Communities! Get questions answers from product experts at Adobe Grab a coffee and have a chat with Product Managers in Experience League Communities. Scroll down to read about what we'll cover. Don't forget to register before it's too late!
Adobe Developers Live	On-demand video events available on Experience League.

Experience League LIVE

Event Date	Time	Event Name	Format	Description
February 3, 2022	On demand	Introducing all new Reference Demos in AEM	Live Video Event	Learn the fastest way to provision, demo, and explore features of AEM as a Cloud Service.

Community Q&A Coffee Breaks

Event Name	Date	Applications	Format	Description
Adobe Target Community Q&A Coffee Break	February 23, 2022 @ 8am PST	Adobe Target, Experience Platform, RTCDP	Forum Q&A	<u>Register now!</u> Join us in the Adobe Target Community from 8 a.m. to 9 a.m. PT for expert answers from Vishal Chordia, Senior Product Manager. He will answer all your Adobe Experience Platform (AEP), Audience-based Personalization, Real-time Customer Data Platform (RTCDP) integration with Target, and General Adobe Target -related questions

Adobe Developer's Live

Event	Date & Time	Type	Description
<u>Adobe Developers Live</u>	On Demand	Video	Developers Live showcases the latest tech advances and developer tools powering design, content creation workflows, document services, and customer experience management across industries. View the keynote address, learn about Analytics APIs, client data layer, Adobe I/O open-source projects, and much more.

Adobe System Status

Adobe System Status provides detailed information, status updates, and email notifications about Adobe products and services outage, disruption, and maintenance events. Check it out at status.adobe.com.

Release date: **November 16, 2021**

What's new

- Adobe Status is now reporting incidents at a Product level. Status Cloud and Product pages have a new look and enhanced filters based on product level reporting of incidents. This makes it easier for you to understand how your product is impacted on status.adobe.com and in your email notifications. If you are not subscribed, please use this link to set up your personalized subscription preferences <https://status.adobe.com/proactive-notifications/manage>
- Status home page is now personalized with events filtered based on your entitlements and product subscriptions. Please check it out at status.adobe.com > **My Events** tab.

New features and enhancements available today

Feature	Description
Product-level reporting of incidents	<ul style="list-style-type: none"> • Each product has a banner on Status that includes latest updates, history, and impact attributes of the product • Emails now follow the same format of product-level impact reporting instead of incident-level reporting
Personalized view of the Status home page	<ul style="list-style-type: none"> • Introducing a new view, My Events on the Overview page. This view filters events based on your entitlements and subscriptions • Entitlements can be for organizations or individuals. Subscriptions can be for products or events

Feature	Description
Enhanced user experience	<ul style="list-style-type: none"> • Cloud pages have a summary of availability of all products, and an ability to filter by product, region, dates, and event types • Product pages have summary of availability of all capabilities and a detailed view of events and history • Enhanced filters are available by capability, data centers/environments (where applicable), region, date, event type, and incident/maintenance status
Enhanced subscriptions with product offerings update	<ul style="list-style-type: none"> • Adobe Analytics offerings are updated to a customer-friendly view (existing Analytics subscriptions are migrated over to new offerings) • Granular offerings for Customer Journey Analytics

Experience Cloud Central UI Components & Administration

Feature	Description
Recents (shortcuts) added to Experience Cloud landing	You can access shortcuts to your most recent Journey Optimizer and Experience Platform activity under the new Recents heading. This update also includes general layout and responsiveness improvements on the landing page.
Sandboxes moved to the header bar	The Sandboxes indicator is now integrated within the header for all Experience Platform interface applications. See Sandboxes in Experience Platform for more information.

New Analytics tutorials and courses

New videos, tutorials, or courses published for Adobe Analytics.

Published	Name	Type	Description
February 2022	<u>Manipulating incoming data with Processing Rules</u>	Video	Get an overview of Processing Rules in Adobe Analytics and learn what they are used for. Learn a few tips, examples, and even a warning.
February 2022	<u>Configuring List Variables</u>	Video	When you must put more than one value into an eVar (a conversion variable) at one time, what are you going to do? List variables to the rescue! Learn how and why you configure and use list variables in Adobe Analytics.
February 2022	<u>Configure traffic classifications</u>	Video	Learn how to configure classifications for traffic variables, often called <i>props</i> , and also for <i>pagename</i> , and so on.
February 2022	<u>Configure conversion classifications</u>	Video	Learn about configuring classifications for conversion variables, also known as <i>eVars</i> . This configuration also applies to products and list variables.

Audience Manager

Fixes and improvements in Audience Manager.

- Resolved an issue causing all API calls to return an Undocumented error when being performed through the Swagger interface. (AAM-59190)
- Resolved an issue causing incorrect user roles to be assigned to partners in some situations. (AAM-59451)
- Resolved an issue causing the API to require case-sensitive authentication headers. (AAM-58528)

For self-help resources, see [Audience Manager documentation and tutorials](#) on Experience League

Adobe Experience Manager

Adobe recommends visiting the [Experience Manager release updates and roadmaps](#) page to stay current on release information.

Experience Manager product releases

- **Experience Manager as a Cloud Service**

Watch the [January 2022 Release Overview video](#) for a summary of the features added in the 2022.1.0 (January 2022) release.

- [December 2021 Release Overview video](#) of new features.
- [October 2021 Release Overview video](#) of new features.
- [September 2021 Release Overview video](#) of new features.

- **Experience Manager Assets as a Cloud Service**

New features in Experience Manager Assets

- Dynamic Media - You can now use Experience Manager - Dynamic Media interface to configure [General Settings](#) and [Publish Setup](#) instead of having to go through the Dynamic Media Classic desktop application.
- Dynamic Media now supports ingestion, preview, playback, and publish for MXF videos. Annotation and shoppable video for MXF videos is not yet supported.
- After configuring a connection between remote DAM and Sites deployments, the assets on remote DAM are made available on the Sites deployment. You can now perform the [update, delete, rename, and move operations](#) on remote DAM assets or folders. The updates, with some delay, are available automatically on the Sites deployment.

New features in Experience Manager Assets prerelease channel

- Dynamic Media now provides the flexibility to let you [configure one company alias account](#) in the user interface, so that out-of-the-box Dynamic Media URLs and Viewer Embed code are updated. This action positively impacts SEO, to reflect updates made to your business context, such as rebranding.
- You can now use the Experience Manager Assets user interface to:
 - Configure the detection of duplicate assets in a repository.

- Configure adding digital watermarks to images.
- Administrators can now configure email service for large downloads. It allows the users to enable email notifications for large downloads from the Experience Manager Assets interface. The user receives an email notification containing the download link of the archived zip folder upon completion of the download process.
- The Manage Publication feature is enhanced with an improved user interface. Users can publish or unpublish content to and from the selected destination, and Add Content to the publishing list from across the DAM repository. They can also Include Folder Settings to publish content of the selected folders and apply filters, and schedule publishing to a later date or time.

Bug Fix

- Unprocessed assets with no original rendition are sent to Asset Compute for processing while migrating assets from Experience Manager On-premise to Cloud Services.
- **Experience Manager Forms as a Cloud Service**

New in Forms

- **Experience Manager Forms as a Cloud Service - Communications** — Communication APIs help you combine a template and XML data to generate print documents in various formats. The service lets you generate documents in synchronous and batch modes. The APIs help you create applications that let you do the following:
 - Generate documents by populating template files with XML data.
 - Generate forms in various formats, including non-interactive PDF print streams.
 - Generate print PDFs from XFA form PDFs.
 - Generate PDF, PostScript, PCL, and ZPL documents in bulk by merging multiple sets of data with source templates.
- **Custom fonts for Document of Record and PDF documents created with Communications APIs** — You can now use brand approved fonts in PDF documents generated using Communications APIs to align with your organizational requirements.

New in Forms prerelease channel

- Assembler API — Assembler APIs to combine, rearrange, augment, and obtain information about PDF documents.

- **Cloud Manager**

Release date

The release date for Cloud Manager in Experience Manager as a Cloud Service 2022.01.0 is 20 January 2022.

The next release is planned for 10 February 2022.

New features

- Cloud Manager avoids rebuilding the code base when it detects that the same git commit is used in multiple full-stack pipeline executions.
- Accessing the Experience Manager environment log now requires the **Deployment Manager** product profile. Users without this profile see a disabled button in the user interface.
- The user interface does not allow front-end pipeline configuration for a program where Sites is not enabled as a solution.
- Upon generating a git password, the expiration date is displayed.

Community

- **Experience Manager GEMs Webinar: *Build Sites Faster with Experience Manager Headless and App Builder***

Date: Wednesday, March 23, 2022

Time: 8:00 A.M. (PST) or 5:00 (CET) or 9:00 (IST)

Speaker: Duy Nguyen, Adobe Software Development Engineer

New features across Advertising Cloud

Last updated: October 27, 2021

Feature	Description
Analytics for Advertising Cloud	If your organization wants to switch from using the legacy Adobe Analytics <code>visitorAPI.js</code> library to the Adobe Experience Platform library (<code>alloy.js</code>) for data collection, you must make changes to enable ID stitching. See Using the Last Event Service JavaScript Library with Adobe Experience Platform Web SDK .

New features in Advertising Cloud DSP

Last updated: **October 27, 2021**

Feature	Description
Custom Reports	<p>You can now create and manage Amazon S3 and different types of FTP delivery locations, called <i>report destinations</i>, for your custom reports. Once you configure report destinations, you can set up each of your new custom reports to be delivered to one or more locations of a single destination type, or to email recipients. Updates to your Amazon S3 and FTP credentials won't interrupt report delivery.</p> <p>Your existing reports are still sent to the specified email recipients. To configure delivery to a different report destination, create a report with the new destination.</p>
Packages, Placements, and Ads views	<p>When you view data for a single day, the trend charts now include hourly data. Hold the cursor over any point to see the data for that hour.</p>
Placements	<p>The placement Inspector now includes an Inventory tab, which shows all deals and their associated metrics for the placement. Use the information to make quick adjustments or troubleshoot issues without generating a custom report.</p>
Ads	<p>(Users with permission to include Clearcastclock numbers in their ads) DSP no longer shows an error if you use a clock number that's attached to another ad. Note: The best practice is to use a unique clock number for each video ad. Otherwise, the publisher does not approve all the ads.</p>
Deal IDs	<p>The Deal ID settings and other places in the user interface reflect new branding for Magnite SSP:</p> <ul style="list-style-type: none"> • The SSP Tremor (Telaria) is now Magnite CTV. • In the coming weeks, Rubicon will change to Magnite DV+, where DV+ stands for display, video, and other formats such as audio.

Feature	Description
Freewheel programmatically guaranteed deals	You can now find the status of ads for Freewheel programmatically guaranteed deals from the Ads view. Previously, you could check the status only from the Deals view.

New features in Advertising Cloud Search

Last updated: October 7, 2021

Feature	Description
Reports, Notification Center	<p>(October 9 release) All email notifications for reports, which Advertising Cloud Search sends when a custom or scheduled report has completed or failed, are now handled by Notification Center. Email notifications and web notifications are enabled by default for reports, but you can optionally change the notification settings. With this change:</p> <ul style="list-style-type: none"> • Email recipients are restricted to users who are registered, authenticated users of Advertising Cloud Search and have access to the advertiser account. This feature ensures that no confidential data is sent to unauthorized users. • The format and contents of the email uses the Notification Center template, which includes more details of the report and includes direct download links for all report formats. • Report notifications are a new notification type, with its own notification preferences, in Notification Center. <p>If you use any automation to pull reports from email notifications, you may need to update the filtering logic to ensure process continuity.</p>
Advertising Insights	Additional insights are available in beta mode.

- Customer Journey Analytics [product documentation and tutorials](#)

Audience Manager

Fixes and improvements in Audience Manager:

Improvement	Description
Validator for target data sources belonging to other companies	<p>Audience Manager released an improvement to the batch data onboarding process. To prevent accidental file and data onboarding into target data sources owned by other partners, Audience Manager has added a mapping requirement between partner ID (PID) and the data sources (DPID) owned by other partners.</p> <ul style="list-style-type: none"> • See also the <code>_DPID_TARGET_DATA_OWNER</code> field in Amazon S3 name and file size requirements for inbound data files. • Adobe-internal consultants and customer care should read Manage onboarding access for second-party data for information about the new mapping require improvement and how to request a new mapping • It is <i>not</i> required to request a mapping for existing data sharing relationships. The mapping is also <i>not</i> required when onboarding data into target data sources that belong to your PID.

For self-help resources, see [Audience Manager documentation and tutorials](#) on Experience League.

Adobe Experience Manager

Adobe recommends visiting the [Experience Manager release updates and roadmaps](#) page to stay current on release information.

Experience Manager product updates

- **Experience Manager 6.5, Service Pack 12 (6.5.12.0)**

Adobe Experience Manager 6.5.12.0 includes new features, key customer-requested enhancements, and performance, stability, and security improvements, that are released since the availability of 6.5 release in April 2019. The service pack is installed on Adobe Experience Manager 6.5.

See the [Release notes](#).

Experience Manager product releases

- **Experience Manager as a Cloud Service**

Watch the [March 2022 Release Overview video](#) for a summary of the features added in the 2022.3.0 (March 2022) release.

- [January 2022 Release Overview video](#) of new features.
- [December 2021 Release Overview video](#) of new features.
- [October 2021 Release Overview video](#) of new features.
- [September 2021 Release Overview video](#) of new features.
- **Experience Manager Assets as a Cloud Service**

New features in Experience Manager Assets

- Dynamic Media - You can now use Experience Manager - Dynamic Media interface to configure [General Settings](#) and [Publish Setup](#) instead of having to go through the Dynamic Media Classic desktop application.
- Dynamic Media now supports ingestion, preview, playback, and publish for MXF videos. Annotation and shoppable video for MXF videos is not yet supported.
- After configuring a connection between remote DAM and Sites deployments, the assets on remote DAM are made available on the Sites deployment. You can now perform the [update, delete, rename, and move operations](#) on remote DAM assets or folders. The updates, with some delay, are available automatically on the Sites deployment.

New features in Experience Manager Assets prerelease channel

- Dynamic Media now provides the flexibility to let you [configure one company alias account](#) in the user interface, so that out-of-the-box Dynamic Media URLs and Viewer Embed code are updated. This action positively impacts SEO, to reflect updates made to your business context, such as rebranding.
- You can now use the Experience Manager Assets user interface to:
 - Configure the detection of duplicate assets in a repository.
 - Configure adding digital watermarks to images.
- Administrators can now configure email service for large downloads. It allows the users to [enable email notifications for large downloads](#) from the Experience Manager

Assets interface. The user receives an email notification containing the download link of the archived zip folder upon completion of the download process.

- The Manage Publication feature is enhanced with an improved user interface. Users can publish or unpublish content to and from the selected destination, and Add Content to the publishing list from across the DAM repository. They can also Include Folder Settings to publish content of the selected folders and apply filters, and schedule publishing to a later date or time.

Bug Fix

- Unprocessed assets with no original rendition are sent to Asset Compute for processing while migrating assets from Experience Manager On-premise to Cloud Services.
- **Experience Manager Forms as a Cloud Service**

New in Forms

- **Experience Manager Forms as a Cloud Service - Communications** — Communication APIs help you combine a template and XML data to generate print documents in various formats. The service lets you generate documents in synchronous and batch modes. The APIs help you create applications that let you do the following:
 - Generate documents by populating template files with XML data.
 - Generate forms in various formats, including non-interactive PDF print streams.
 - Generate print PDFs from XFA form PDFs.
 - Generate PDF, PostScript, PCL, and ZPL documents in bulk by merging multiple sets of data with source templates.
- **Custom fonts for Document of Record and PDF documents created with Communications APIs** — You can now use brand approved fonts in PDF documents generated using Communications APIs to align with your organizational requirements.

New in Forms prerelease channel

- Assembler API — Assembler APIs to combine, rearrange, augment, and obtain information about PDF documents.
- **Cloud Manager**

Release date

The release date for Cloud Manager in Experience Manager as a Cloud Service 2022.01.0 is 20 January 2022.

The next release is planned for 31 March 2022.

New features

- Cloud Manager avoids rebuilding the code base when it detects that the same git commit is used in multiple full-stack pipeline executions.
- Accessing the Experience Manager environment log now requires the **Deployment Manager** product profile. Users without this profile see a disabled button in the user interface.
- The user interface does not allow front-end pipeline configuration for a program where Sites are not enabled as a solution.
- Upon generating a git password, the expiration date is displayed.

- [New features in Advertising Cloud Search](#)
- [New Advertising Cloud tutorials](#)

New features in Advertising Cloud Search

Last updated: April 11, 2022

Feature	Description
Campaigns Advertising Insights	<p>(April 11; Google Ads accounts) Advertising Cloud Search has transitioned all API calls from the legacy Google AdWords API to the latest Google Ads API. Moving to the new Google Ads API will ensure continuity with existing capabilities and enable access to Google's latest Ads features.</p> <p>Some features have not yet been updated to the new API and are temporarily unavailable:</p> <ul style="list-style-type: none"> • Location extensions: <ul style="list-style-type: none"> Location extensions aren't visible in the Extensions view. • You can't create an extension. • Filters on locations don't work. • Advertising Insights: The Impression Share Lost and Query Cross Matching Beta analyses aren't available. <p>We anticipate restoration of location extension capabilities by the end of April. Once we determine when the affected Advertising Insights modules can also be restored, we'll send an update with the estimated date.</p>

Feature	Description
Portfolios	<p>(March 12 release) By default, hybrid optimization is available at the campaign level. You can now optionally enable hybrid optimization at the ad group level, for which the optimization capability sets Google CPA or ROAS targets at the ad group level for more precise control over performance.</p> <p>With any portfolio, you must allow for a learning period before you launch the portfolio to ensure that it has sufficient model coverage. Similarly, if you change a hybrid portfolio from campaign-level to ad group-level optimization, then set the portfolio to the active state for about two weeks. This ensures that the optimization capability has time to learn about the included ad groups and generate targets.</p> <p>To support ad group-level optimization, custom simulations can now include results by ad group. Run a custom simulation with ad group-level results before you launch a hybrid portfolio with ad group-level optimization.</p>
Portfolios Campaigns	<p>(Match 12 release; Beta feature for Microsoft® Advertising campaigns) - You can now configure search campaigns to use the Maximize Conversions bidding strategy, and optionally set a maximum cost per click.</p> <p>If you are already participating in the hybrid optimization beta for other auto-bidding strategies, you automatically have access to the Maximize Conversions strategy, and you can include campaigns with the Maximize Conversions strategy in hybrid portfolios. To use this strategy in a hybrid portfolio, you must enable uploading of Advertising Cloud Search objectives to Microsoft® Ads. If you aren't already participating in the beta and want to join, contact your Adobe account manager.</p>
Campaign Audiences Campaign Bulksheets	<p>(March 12 release; Microsoft® Advertising campaigns) - You can now use any of your Microsoft® Advertising audiences except for in-market audiences as either campaign-level targets or adgroup-level targets. Previously, you could use them only as adgroup-level targets.</p>
Campaign Audiences	<p>(March 12 release; Beta feature for Microsoft® Advertising accounts that are eligible for Customer Match) You can now create and manage customer match audiences by uploading CSV files with email addresses. The data must be hashed using the SHA-256 algorithm.</p>

New Advertising Cloud tutorials

Published	Name	Type	Description
March 2022	How to create a standard display placement	Video	Learn how to create a standard display placement for an Advertising Cloud DSP campaign.

Adobe Document Cloud

New Customer Journey Analytics tutorials and courses

New video tutorials, articles, and courses published for Customer Journey Analytics.

Published	Name	Type	Description
April 2022	<u>Overview of configuring Data Views for Customer Journey Analytics</u>	Video	Learn about configuring Data Views for Customer Journey Analytics. Data Views are similar to Virtual Report Suites in Adobe Analytics. They allow you to configure the incoming data so that it can be most useful for your reporting and analysis.
April 2022	<u>Connections Details Experience in CJA</u>	Video	Learn how to check the status of your connection's datasets and of the ingestion process.

Audience Manager

Fixes and improvements in Audience Manager:

Improvement	Description
Validator for target data sources belonging to other companies	<p>Audience Manager released an improvement to the batch data onboarding process. To prevent accidental file and data onboarding into target data sources owned by other partners, Audience Manager has added a mapping requirement between partner ID (PID) and the data sources (DPID) owned by other partners.</p> <ul style="list-style-type: none"> • See also the <code>_DPID_TARGET_DATA_OWNER</code> field in Amazon S3 name and file size requirements for inbound data files. • Adobe-internal consultants and customer care should read Manage onboarding access for second-party data for information about the new mapping require improvement and how to request a new mapping • It is <i>not</i> required to request a mapping for existing data sharing relationships. The mapping is also <i>not</i> required when onboarding data into target data sources that belong to your PID.

For self-help resources, see [Audience Manager documentation and tutorials](#) on Experience League.

Adobe Experience Manager

Adobe recommends visiting the [Experience Manager release updates and roadmaps](#) page to stay current on release information.

Experience Manager product releases

- **Experience Manager as a Cloud Service**

Watch the [March 2022 Release Overview video](#) for a summary of the features added in the 2022.3.0 (March 2022) release.

- [January 2022 Release Overview video](#) of new features.
- [December 2021 Release Overview video](#) of new features.

- [October 2021 Release Overview video](#) of new features.
- [September 2021 Release Overview video](#) of new features.
- **Experience Manager Assets as a Cloud Service**

New features in Assets

- Experience Manager Dynamic Media now provides the flexibility to [configure one alias account](#) in the user interface, thus ensuring out-of-the-box Dynamic Media URLs and Viewer Embed code are updated. This update positively impacts SEO to reflect updates made to your business context, such as rebranding.
- You can now use the Experience Manager Assets user interface to:
 - Configure the [detection of duplicate assets](#) in a repository.
 - Configure [adding digital watermarks](#) to images.
- The administrators can now configure email service for large downloads. It allows the users to [enable email notifications for large downloads](#) from the Experience Manager Assets interface. The user receives an email notification containing the download link of the archived zip folder upon completion of the download process.
- The [Manage Publication](#) feature is enhanced with an improved user interface. A user can publish or unpublish content to and from the selected destination, or [Add Content](#) to the publishing list from across the DAM repository. They can [Include Folder Settings](#) to publish content of the selected folders and apply filters, and [schedule publishing](#) to a later date or time.

New features in Experience Manager Assets prerelease channel

- You can [sort tags](#) while creating smart tags and when applying search filters using the tags predicate.
- **Experience Manager Forms as a Cloud Service**

New in Forms

- **Communications - Document Generation APIs** — [Document Generation APIs](#) help to combine, rearrange, and validate PDF documents. The service lets you generate documents in synchronous mode. The APIs lets you create applications to do the following:
 - Assemble PDF documents

- Disassemble PDF documents
- Convert to and validate PDF/A-compliant documents.
- **Automatically convert PDF Forms more than 15 pages to adaptive forms** — You can now use automated forms conversion service to convert PDF Forms with up to 40 pages to adaptive forms. The service now provides the option to convert sections of forms more than 15 pages to adaptive form fragments. It helps improve rendering speed of converted forms and makes it easier to load large forms in the adaptive form editor.

New in Forms prerelease channel

- **Use custom XCI for generating a Document of Record** — You can now use a custom XCI file to set various properties of a Document of Record. It overrides the primary XCI with the custom changes.
- **Use invisible CAPTCHA in an adaptive form** — You can use the invisible CAPTCHA to show the CAPTCHA challenge only if suspicious activity is found. If no suspicious activity is found, the CAPTCHA challenge is not displayed.
- **CIF add-on**

New features

- Beta - Experience Manager CIF Search Core Component support Commerce LiveSearch.
- Improved SEO for multi-store scenarios - URL formats for PDP / PLP can now be configured on a store level via the CIF Cloud Config properties.
- Product picker supports staged products by way of the new filter option in the user interface. This ability lets content practitioners prepare product content management for upcoming product launches.
- Simplified CIF configuration management and error handling by using CIF Cloud Config name instead of config proxy URL.
- Manual category selection for Product list and Carousel components. This ability lets content practitioners use these components on content pages, outside of the catalog experience.
- **Experience Manager as a Cloud Service Foundation**

New features

- For more efficient and effective troubleshooting of custom features in Cloud environments, Adobe has released a new developer tool: [the Repository Browser](#). It is a

lightweight, read-only, HTML browser that you can launch from the Developer Console. Get visibility into the content repository on the publisher, author, and preview tiers, and in all environments, including production, stage, and dev. Browse the content structure, view properties, and preview and download binaries.

- The credentials used to authenticate server-to-server API calls (for example, for GraphQL API requests) can now be refreshed before expiration in a self-serve way from the Developer Console. See the [documentation](#) for more info.
 - Version purge and audit log purge maintenance tasks, which had not previously been enabled, are now enabled for new environments. See the associated values in the [Maintenance Task](#) article.
 - Experience Manager as a Cloud Service SDK Dispatcher Tools now support Mac computers with the M1 chip.
- **Cloud Manager**

Release date

The release date for Cloud Manager in Experience Manager as a Cloud Service 2022.02.0 was 10 February 2022.

The next release is planned for 10 March 2022.

New features

- New accelerated [Web Tier Config pipelines](#) have been introduced to exclusively deploy HTTPD/dispatcher configuration.
 - You must be on AEM version 2021.12.6151.20211217T120950Z or newer and [opt in to the flexible mode of the Dispatcher tools](#) to use this feature.
 - This feature is planned for roll-out in a phased approach over the two weeks following the 2022.02.0 release.
- The Cloud Manager landing page experience has been refreshed to deliver improved navigation, easy switching between grid/tile views, and pop-overs for quick program summary.
- A new failing threshold (< D) has been added to the [reliability rating metric](#).
 - Customers with severe quality issues that impact system stability, primarily related to invalid indexes and workflow processes, cannot deploy until those issues are resolved.
- The severity of the BannedPath [quality rule](#) has been changed from blocker to critical.

- The pipeline wizard informs the user when an Experience Manager environment update may be needed before configuring a [Web Tier Config pipeline](#) associated with it.

Community

- **Upcoming Experience Manager GEMs Webinar**
 - Topic: *Integrate AEM & CIF framework to build a rich and immersive e-commerce experience*
 - Date: Wednesday, April 27, 2022
 - Time: 8:00 a.m. PDT / 5:00 p.m. CET / 8:30 p.m. IST
 - [Register here](#)
 - Adobe Summit 2022 | Complete session list and recordings are [available here](#).

New Experience Manager courses and tutorials

New videos, tutorials, and courses published over the past month.

Published	Name	Type	Description	Product
April 2022	Document generation using the communication API	Course	Merge data with xdp template by invoking the HTTP endpoints of Forms CS.	AEM Forms

Published	Name	Type	Description	Product
April 2022	<u>Assemble PDFs using invoke DDX operation</u>	Video	Repository Browser is a powerful tool that provides visibility into AEM's underlying data store, allowing for easy debugging of AEM as a Cloud Service environment. Repository Browser supports inspecting all resources and properties of AEM on Production, Stage, and Development, as well as Author, Publish, and Preview services.	AEM CS

Adobe Advertising Cloud

Release notes for Adobe Advertising Cloud.

- [New features in Advertising Cloud Search](#)

New features in Advertising Cloud Search

Last updated: **April 22, 2022** for April 23 release

Feature	Description
Audiences	(Microsoft Advertising accounts that are eligible for Customer Match) All users can now create and manage customer match audiences by uploading CSV files with email addresses. The data must be hashed using the SHA-256 algorithm.
Campaigns	<p>The following beta features are available to advertisers who opt in:</p> <ul style="list-style-type: none"><li data-bbox="451 562 1380 745">• (Microsoft Advertising accounts) Synchronization, read-only visibility, and reporting (including view-through data) support for your existing native ad campaigns on the Microsoft Audience Network, including Microsoft Audience Ads.<li data-bbox="451 787 1412 924">• (Google Ads and Microsoft Advertising accounts) Ability to import your Google Ads campaigns and campaign structure to Microsoft Advertising from within Advertising Cloud Search. <p>Contact your Adobe account manager if you're interested in either beta program.</p>

Feature	Description
<p>Campaigns</p> <p>Portfolios</p>	<p>(Microsoft Advertising campaigns) Support is available for the following bidding strategies:</p> <ul style="list-style-type: none"> • (General availability) Maximize Conversions, Target CPA, and Target Return on Ad Spend: These strategies are now available to everyone. You can add search campaigns with these bidding strategy to hybrid (but not standard) portfolios. • (Beta feature) Target Impression Share: If you are participating in the hybrid optimization beta, you can configure campaigns with this strategy, and optionally set a target impression share, a target ad position, and a maximum cost per click. Caution: This option isn't yet supported in hybrid portfolios and can't be added to standard portfolios. • (Beta feature) Maximize Clicks: If you are participating in the hybrid optimization beta, you can configure campaigns with this strategy, and optionally set a target maximum cost per click. You can include campaigns with this strategy in either standard or hybrid portfolios. To use this strategy in a hybrid portfolio, the portfolio's objective must include only Adobe properties (metrics), and you must enable uploading of Advertising Cloud Search objectives to Microsoft Ads. <p>If you aren't already participating in the hybrid optimization beta and want to join, contact your Adobe account manager.</p>
<p>Advertising Insights</p>	<p>All insights except for Query Cross Matching and Hybrid Portfolio Setup Readiness are now out of beta.</p>

Feature	Description
<p>Campaigns</p> <p>Advertising Insights</p>	<p>(April 11; Google Ads accounts) Advertising Cloud Search has transitioned all API calls from the legacy Google AdWords API to the latest Google Ads API. Moving to the new Google Ads API ensures continuity with existing capabilities and enable access to Google's latest Ads features.</p> <p>Some features have not yet been updated to the new API and are temporarily unavailable:</p> <ul style="list-style-type: none"> • Location extensions: <ul style="list-style-type: none"> Location extensions aren't visible in the Extensions view. • You can't create an extension. • Filters on locations don't work. • Advertising Insights: The Impression Share Lost and Query Cross Matching Beta analyses aren't available. <p>We anticipate restoration of location extension capabilities by the end of April. Once we determine when the affected Advertising Insights modules can also be restored, we'll send an update with the estimated date.</p>
<p>Integration with Adobe Analytics</p>	<p>(April 7) In the data feed that Advertising Cloud sends to Analytics, data for Google Ads and Microsoft Advertising responsive search ads (RSAs) are reclassified with the Ad Type "Responsive Search Ads" when they receive new clicks. Previously, the data was included for the Ad Type "Text Ads." RSAs in inactive campaigns won't be reclassified.</p> <p>For reclassified RSAs, the Responsive Ad Title is now populated with the first headline and the Responsive Ad Description is populated with the first description.</p>

New tutorials and courses published for Adobe Document Cloud.

Published	Name	Type	Description	Application
April 2022	<u>Getting started with Adobe Acrobat</u>	Course	Learn why over 5 million organizations around the world turn to Acrobat to create unparalleled digital documents that move business forward. Experience League events

Experience League events are a great place to learn, interact, and get answers from product experts at Adobe!

Updated May 27, 2022

Event	Type	Description
<u>Experience Makers Government Forum</u>	On-demand video	The 13th Annual AEMGF on May 10 was a success, with a combination of virtual and in-person attendees. Mainstage and breakout sessions focused on the theme of <i>Digital Experiences that Put People First</i> . Top sessions included <i>Manhunters: How We Took Down Pablo Escobar</i> , <i>The Future of CX</i> , and <i>The Golden Age of Creativity and the Modern Workplace</i> .
<u>Ask the experts: The basics of Web SDK</u>	Webinar	Understanding and using data collection best practices. <u>Schedule & past events</u>
<u>Adobe Campaign - Customer Success Webinar Series</u>	Peer2Peer: Enhancing Your Customer Journeys via Adobe Campaign.	Join this live Peer2Peer discussion with Anja Starun, head of Engagement Operations across Streamotion's Kayo, Binge, and Flash brands. Hear directly from her about the successful strategies that her team implemented to create individualized customer journeys using Adobe Campaign. Date: May 26 @ 3 p.m. EST <u>Details & registration</u>
<u>Adobe Target Community</u>	Q&A Coffee Break	Join Brent Kostak and Drew Burns of the Adobe Target product team who can answer your Adobe Target Questions about shared audiences, Real-Time CDP, first-party data, end-to-end personalization workflows, and more. Watch the recent <u>Real-Time Personalization webinar</u> and bring your follow-up Questions to the experts on the <u>Coffee Break thread</u> in the Adobe Target Community! Date: May 25, 2022 @ 8 a.m. PDT <u>Details and registration</u>

Event	Type	Description
Push notifications with Journey Optimizer - How to easily configure your mobile app for push	Experience League LIVE	Learn about the common use cases for push notification with Adobe Journey Optimizer and dive into the technical details on how to configure an app for Push powered by Adobe Experience Platform. Date: May 12, 2022 @ 9:30 a.m. PDT Schedule & past events
Adobe Developers Live: Commerce	On-demand videos	<i>Adobe Developers Live: Commerce 2022</i> brings together developers and experience builders with diverse backgrounds and a singular purpose - to create incredible end-to-end experiences. This one-day virtual conference features important Commerce and Open Source Developer updates, technical sessions, community networking opportunities and more.
Marketo Skill Exchange	On-demand videos	Learn about the importance of your Marketo roadmap and how to avoid poor planning. Get advice on unlocking the potential of Program Member Custom Fields, Marketo Engage tips and tricks, and much more in the Marketo Skill Exchange from August 2021, now on Experience League.
Adobe Summit 2022	On-demand sessions	Learn from Adobe executives, Ryan Reynolds, Rosalind Brewer, CEO, Walgreens Boots Alliance, Inc, John Donahoe, CEO, NIKE, Inc., and Gail J. McGovern, CEO, American Red Cross as they share how customer experiences are the currency of our digital economy. Explore on-demand sessions from Adobe Summit 2022.

Adobe System Status provides detailed information, status updates, and email notifications about Adobe products and services outage, disruption, and maintenance events. Check it out at status.adobe.com.

Adobe Experience Platform

Latest release information and new documentation for Experience Platform and Mobile SDK:

Planned release date: **May 25, 2022**

- [Experience Platform release notes](#)

New Experience Platform tutorials and courses

New video tutorials, articles, and courses published for Experience Platform.

Published	Name	Type	Description	Application
May 2022	<u>Segment Match pre-share insights</u>	Video	When you are deciding on a strategic partner to share data with, it is important to know how your customers match up, so that you know how useful that data share will be. Segment Match allows you to see the overlap with potential data partners before sharing any data.	Real-time Customer Data Platform
May 2022	<u>Segment Match connection setup</u>	Video	learn how to set up the connection between you and a partner so that you can share audiences. After configuring this Segment Match feature, you will be able to share data back and forth with your data partner.	Real-time Customer Data Platform
May 2022	<u>Segment Match data governance</u>	Video	Learn how to set up and use data governance controls in Real-Time CDP so that you can limit which datasets (and therefore which segments that use those datasets) can be shared with data partners.	Real-time Customer Data Platform
May 2022	<u>Segment Match configuration flow</u>	Video	Learn the process of configuring a Segment Match instance for a data share.	Real-time Customer Data Platform

Published	Name	Type	Description	Application
May 2022	Connecting to destinations	Video	Before you can send data to destination partners from Real-time CDP, you first make the connections to those partners. This video walks through that process, typically performed by Admins.	Real-time Customer Data Platform
May 2022	Create schemas	Video	This video shows you how to create schemas in Adobe Experience Platform using the XDM Individual Profile class and various field groups.	Experience Platform
May 2022	Analyze and visualize omni-channel insights in Tableau using Query Service	Video	Learn how you can use Adobe Experience Platform's Query Service with external data visualization tools using a churn analysis example.	Experience Platform

Adobe Mobile SDK

See [Release notes and change logs](#) for the Adobe Experience Platform Mobile SDKs.

Adobe Analytics

Release date: May 18, 2022

- [Adobe Analytics release notes](#)
- [Adobe Analytics product documentation and tutorials](#)

AppMeasurement

Release version: 2.22.4

- [AppMeasurement for JavaScript release notes](#)

New Analytics tutorials and courses

New video tutorials, articles, and courses published for Adobe Analytics.

Published	Name	Type	Description
May 2022	Get started with Report Builder	Video	Learn the basics of using Report Builder, including installation, sign-in, and data requests.
May 2022	Navigate the new landing page	Video	Learn how to make the most of the new Analytics landing page and its features.
May 2022	Next/Previous and Page Summary Workspace panels & reports	Video	See the two new panel types in Analysis Workspace - Next/Previous and Page Summary. These bring Workspace to parity with some of the more popular Reports & Analytics reports.
May 2022	Analysis Workspace landing page updates	Video	Learn about some of the great improvements and additions to the new landing page. We've taken your customer feedback and tried to incorporate the most salient features such as column resizing, new column types, links to real-time and bot reports and many others.
May 2022	Are you asking the right questions?	Video	Learn how it's more valuable identifying and collecting the actionable data points than to record every possible element. Identifying those data points efficiently requires a basic plan and creative discussions with the stakeholders.

Published	Name	Type	Description
May 2022	Use Report Builder advanced delivery options for Power BI	Video	Learn how to set up an advanced schedule to send a Report Builder workbook to Power BI.
May 2022	Schedule a Report Builder request	Video	Learn how to set up a basic schedule for a Report Builder workbook.

Customer Journey Analytics

- [Customer Journey Analytics release notes](#)
- [Customer Journey Analytics product documentation and tutorials](#)

Streaming Media Analytics

Last update: March 23, 2022

- [Streaming Media Analytics release notes](#)
- [Streaming Media Analytics product documentation and tutorials](#)

Audience Manager

Fixes and improvements in Audience Manager:

Improvement	Description
<p>Validator for target data sources belonging to other companies</p>	<p>Audience Manager released an improvement to the batch data onboarding process. To prevent accidental file and data onboarding into target data sources owned by other partners, Audience Manager has added a mapping requirement between partner ID (PID) and the data sources (DPID) owned by other partners.</p> <ul style="list-style-type: none"> • See also the <code>_DPID_TARGET_DATA_OWNER</code> field in Amazon S3 name and file size requirements for inbound data files. • Adobe-internal consultants and customer care should read Manage onboarding access for second-party data for information about the new mapping require improvement and how to request a new mapping • It is <i>not</i> required to request a mapping for existing data sharing relationships. The mapping is also <i>not</i> required when onboarding data into target data sources that belong to your PID.

For self-help resources, see [Audience Manager documentation and tutorials](#) on Experience League.

Adobe Experience Manager

New features, fixes, and updates in Experience Manager. Adobe recommends customers with On-Premise deployments to deploy the latest patches to ensure higher stability, security, and performance.

Adobe recommends visiting the [Experience Manager release updates and roadmaps](#) page to stay current on release information.

Experience Manager product releases

- Experience Manager as a Cloud Service

Watch the [April 2022 Release Overview video](#) for a summary of the features added in the 2022.4.0 (April 2022) release.

- [March 2022 Release Overview video](#).
- [January 2022 Release Overview video](#).
- [December 2021 Release Overview video](#).
- [October 2021 Release Overview video](#).
- [September 2021 Release Overview video](#).
- **Experience Manager Sites as a Cloud Service**

New feature

- You can now define content model data types as [translatable](#) using a checkbox in the content model editor. Also, Experience Manager translation rules and configurations are automatically updated.

New feature in prerelease channel

- Publish Experience Fragments to Preview – To preview final experiences that your visitors can see, you can publish standalone Experience Fragments to Experience Manager as a Cloud Service Preview Service.
- **Experience Manager Assets as a Cloud Service**

New feature

- You can now [sort tags](#) in the tag picker window in ascending or descending order based on the tag name, date of creation, or date of modification.

- **Experience Manager Forms as a Cloud Service**

New features

- **Communications - Document Manipulation APIs support in Forms as a Cloud Service SDK** – [Document Manipulation APIs](#) help to combine, rearrange, and validate PDF documents. You can now use Communications - Document Generation APIs on a local development environment with the help of Experience Manager Forms as a Cloud Service SDK.
- **Use custom XCI for generating a Document of Record** – You can now [use a custom XCI file to set various properties of a Document of Record](#). It overrides the primary XCI with the custom changes. It provides more control over the generation of Documents of Record, increasing personalization, and customization opportunities.

- **Use invisible CAPTCHA in an adaptive form** – You can use the [invisible CAPTCHA to show the CAPTCHA challenge only if there is suspicious activity](#). If no suspicious activity is found, the CAPTCHA challenge is not displayed. It helps assess human form completion without checkbox requirements, reduce customization efforts, and improve the end-user experience.
- **Form Data Model Configurations** – You can now [reuse Form Data Model configurations across environments](#), simplifying data integrations and reducing IT costs.
- **Experience Manager Screens as a Cloud Service**

New feature

- Bulk Channel Assignment - Users can select multiple channels and assign to multiple displays at the same time, in one operation.

- **Experience Manager as a Cloud Service Foundation**

SDK Build Analyzers

The Experience Manager as a Cloud Service SDK Build Analyzer Maven Plugin detects problems in a maven project, including missing dependencies. It gives developers an opportunity to discover issues during local development, well before deploying to Cloud environments with Cloud Manager.

A new analyzer has been recently added:

- content-packages-validation – validates for well-formed content syntax and structure for packages that are installed during deployment.

Adobe recommends that you update your maven project with the latest version of the analyzer or include the analyzer if you have not yet done so. See the [documentation](#) for more information.

- **Cloud Manager**

New features

- Environments page has a column to display Experience Manager Version of environment.
- Pipeline execution now displays user interface top-level errors on the execution screen.
- Re-execute Production Deploy Step via Cloud Manager user interface.
- Reuse build images for re-execute production deploy step.
- New API to enable self-service deletion of network infrastructure.

- **Best Practices Analyzer**

New features

- Ability to detect and report on usage of unsupported Asset Manager APIs. There are four APIs that are no longer supported in Experience Manager as a Cloud Service. Customers should ensure that they are no longer using these APIs and should be using the new method of asset upload.
- Ability to detect usage of Content Fragment templates. Content Fragment templates are no longer supported for new content fragment creation on Experience Manager as a Cloud Service. Customers must create content fragment models to replace content fragment templates.
- Ability to detect assets with more than 100 descendants under the metadata node of the asset in the repository. Adobe recommends you remove metadata nodes that you do not need so you can improve the performance when loading folders that consist of such assets.
- Ability to detect and report on the type of Data Store used.
- Pattern updated for Experience Manager Form Portal.

Adobe Marketo Engage

Marketo Engage is a complete application for lead management and B2B marketers looking to transform customer experiences by engaging across every stage of complex buying journeys.

Newly published video events on Experience League:

Published	Name	Type	Description
May 2022	Marketo Skill Exchange	Videos	Begin with learning about your Marketo roadmap. Then, discover the importance of thinking of your Marketo instance as a product. Get advice on unlocking the potential of Program Member Custom Fields, Marketo Engage tips and tricks, and more, in this newly published Marketo Skill Exchange from August 2021, now on Experience League.

Core Marketo Engage updates

See Marketo Engage [release schedule](#) for the latest release schedule information and release notes.

Adobe Workfront

Adobe Workfront is a unified work management application for sharing ideas, creating content, managing complex processes, and doing their best work.

See the [Workfront releases](#) page for a round-up of the latest information for all products.

Adobe Advertising Cloud

Release notes for Adobe Advertising Cloud.

- [New features in Advertising Cloud DSP](#)
- [New features in Advertising Cloud Search](#)

New features in Advertising Cloud DSP

Feature	Description
Custom Reports	(31 May; beta feature) Advertising Cloud DSP can now ingest first-party segments comprised of authenticated signals built within a customer data platform (CDP).
Optimization Goals	(25 May) Video and native placements can now be included in packages with the custom goals Highest ROAS and Lowest CPA.

New features in Advertising Cloud Search

Last updated: May 12, 2022 for May 14 release

Feature	Description
Campaigns	<p>The following beta features are available to all advertisers:</p> <ul style="list-style-type: none"> • (Microsoft® Advertising accounts) Synchronization, read-only visibility, and reporting (including view-through data) support for your existing native ad campaigns on the Microsoft® Audience Network, including Microsoft® Audience Ads. • (Google Ads and Microsoft® Advertising accounts) Ability to import your Google Ads campaigns and campaign structure to Microsoft® Advertising from Search > Tools > Import Campaigns Beta. <p>Once you import campaigns, you can check the status of your import job, review any error logs, and edit, pause, or delete your import schedule.</p>
Campaigns Portfolios	<p>(Microsoft® Advertising campaigns) The following bidding strategies are now available to all users:</p> <ul style="list-style-type: none"> • Target Impression Share: You can configure campaigns with this strategy, and optionally set a target impression share, a target ad position, and a maximum cost per click. Caution: This option isn't yet supported in hybrid portfolios and can't be added to standard portfolios. • Maximize Clicks: You can configure campaigns with this strategy, and optionally set a target maximum cost per click. You can include campaigns with this strategy in either standard or hybrid portfolios. To use this strategy in a hybrid portfolio, the portfolio's objective must include only Adobe properties (metrics), and you must enable uploading of Advertising Cloud Search objectives to Microsoft® Ads.
Integration with Adobe Analytics	<p>(May 7) In the data feed that Advertising Cloud sends to Analytics, data for Google Ads dynamic search ads is available only down to the ad group level beginning on 7 May 2022.</p>

Adobe Document Cloud

New tutorials and courses published for Adobe Document Cloud.

Published	Name	Type	Description	Application
May 2022	Sharing account access	Video	Learn how to set up view-only access to transactions in another user's account.	Acrobat Sign
May 2022	Managing document templates	Video	Learn how to edit or delete a template in your library.	Acrobat Sign
May 2022	Create your first flow in Microsoft® Power Automate	Article	Learn how to create your first flow in Microsoft® Power Automate using the Adobe PDF Services connector.	Document Services
May 2022	Getting credentials for Microsoft® Power Automate	Article	Learn how to get credentials to start using or trialing Adobe PDF Services. Depending on whether you are a trial user or an existing customer, this tutorial walks through the proper steps to get credentials.	Document Services

Audience Manager

Fixes and improvements in Audience Manager:

Improvement	Description
Validator for target data sources belonging to other companies	<p>Audience Manager released an improvement to the batch data onboarding process. To prevent accidental file and data onboarding into target data sources owned by other partners, Audience Manager has added a mapping requirement between partner ID (PID) and the data sources (DPID) owned by other partners.</p> <ul style="list-style-type: none"> • See also the <code>_DPID_TARGET_DATA_OWNER</code> field in Amazon S3 name and file size requirements for inbound data files. • Adobe-internal consultants and customer care should read Manage onboarding access for second-party data for information about the new mapping require improvement and how to request a new mapping • It is <i>not</i> required to request a mapping for existing data sharing relationships. The mapping is also <i>not</i> required when onboarding data into target data sources that belong to your PID.

For self-help resources, see [Audience Manager documentation and tutorials](#) on Experience League.

Adobe Experience Manager

New features, fixes, and updates in Experience Manager. Adobe recommends customers with On-Premise deployments to deploy the latest patches to ensure higher stability, security, and performance.

Adobe recommends visiting the [Experience Manager release updates and roadmaps](#) page to stay current on release information.

Experience Manager product updates

- Experience Manager as a Cloud Service

Watch the [May 2022 Release Overview video](#) for a summary of the features added in the 2022.5.0 (May 2022) release.

- [April 2022 Release Overview video](#)
- [March 2022 Release Overview video](#).
- [January 2022 Release Overview video](#).
- [December 2021 Release Overview video](#).
- [October 2021 Release Overview video](#).
- [September 2021 Release Overview video](#).
- **Experience Manager Sites as a Cloud Service**
New feature in prerelease channel
 - Various GraphQL functionalities.
 - A [new console](#) optimized for headless use of content fragments.

- **Experience Manager Assets as a Cloud Service**

New features

- [Dynamic Media Smart Imaging now supports AVIF file format](#) - further improve Google Core Web Vital (Largest Contentful Paint), with AVIF providing 20% extra size reduction over WebP. In total, AVIF provides up to 41% average size reduction over JPEG (in some images even as high as 76%).
- Experience Manager Assets Brand Portal now runs automatic jobs every 12 hours to delete all Brand Portal assets that are published to Experience Manager. As a result, you do not need to delete the assets in the Contribution folder manually to keep the folder size below the threshold limit. See [What's new in Experience Manager Assets Brand Portal](#).

New feature in prerelease channel

- Experience Manager Assets uses Adobe Sensei AI capabilities to now [distinguish between colors in an image and apply differences as tags automatically on ingestion](#). These tags enable enhanced Search experience, based on image color composition. You can configure the number of colors, within a range of one to 40, that are tagged to an image so that you can search for images based on those colors later.
- **Experience Manager Forms as a Cloud Service**

New features in prerelease channel

- **Integrate Adaptive Forms with Microsoft® Power Automate** – You can now configure an Adaptive Form to run a Microsoft® Power Automate Cloud Flow on submission. The configured Adaptive Form sends captured data, attachments, and Document Of Record to Power Automate Cloud Flow for processing. It helps you build custom data capture experience while harnessing the power of Microsoft® Power Automate to build business logics around captured data and automate customer workflows.
- **Wizard to create an Adaptive Form** – You can use business user friendly wizard to quickly author Adaptive Forms. The wizard provides a quick tab navigation to easily select pre-configured template, styling, fields, and submission options to create an adaptive form.
- **Experience Manager as a Cloud Service Foundation**

New features

- The **Add tree** option under the replication agent admin screen's **Distribute** tab, which was previously announced as deprecated, will be removed on June 20, 2022 or soon thereafter. Packages with a tree hierarchy of content should instead be replicated using [Manage Publication](#) or the [Publish Content Tree workflow](#).
- Using the replication agent admin screen or replication API for distributing content packages larger than 10 MB (nodes with properties, not including binaries) is deprecated and will be enforced on September 12, 2022 or soon thereafter. Instead, [Manage Publication](#) or the [Publish Content Tree workflow](#) must be used to replicate these large content packages. In July 2022, a warning message appears in the replication agent admin screen's **Distribute** tab. It appears if you are attempting to replicate these large content packages and also in the Experience Manager error log whenever the replication API is used to replicate these large content packages. In September, warnings will be replaced by errors. Adobe recommends that you adjust your processes accordingly.

New feature in prerelease channel

- Experience Manager as a Cloud Service is now integrated with Unified Shell to improve the user experience and unify it with all the other Experience Cloud applications. See [Experience Manager as a Cloud Service on Unified Shell](#) for more details.
- **Experience Manager as a Cloud Service Foundation Security**
 - **Deprecation of TLS 1.0 and TLS 1.1** – Starting June 30, 2022, Experience Manager as a Cloud Service will require a more secure network communication and data exchange

with users systems. Experience Manager will use exclusively TLS (Transport Layer Security) 1.2 protocol. TLS 1.0 and 1.1 will be deprecated.

If you continue to use TLS 1.0 or TLS 1.1, you could potentially lose access to Experience Manager as a Cloud Service.

Adobe Advertising Cloud

Release notes for Adobe Advertising Cloud.

- [New features in Advertising Cloud DSP](#)
- [New features in Advertising Cloud Search](#)

New features in Advertising Cloud DSP

Last updated: July 14, 2022

Feature	Description
Custom Reports	(31 May release; beta feature) Advertising Cloud DSP can now ingest first-party segments comprised of authenticated signals built within a customer data platform (CDP).
Inventory	(June 29 release) The new Inventory > Deals view includes the same data customization capabilities as the Campaigns views, including additional filters, column customization and the option to save custom views, column sorting, and a data visualization (chart) view. You can open a command menu in each row by clicking ... after the deal name.
Inventory Inspector	(June 29 release) The Inventory tab of the placement Inspector now includes customizable data visualization charts and expanded performance metrics, such as Viewability Rate, Clicks, and Yesterday's CPM.

New features in Advertising Cloud Search

Last updated: July 14, 2022

Feature	Description
Insights	(June 11 release) The Impression Share Lost analysis is now available again as a beta feature.
Advanced Campaign Management	(June 20) (Google Ads and Microsoft Advertising campaigns) You can now create dynamic responsive search ad variations using a search engine-specific ad template, based on the contents of your inventory, from Campaigns > Advanced (ACM).

Adobe Document Cloud

New tutorials and courses published for Adobe Document Cloud.

Published	Name	Type	Description
June 2022	Using the delegator role	Video	Learn to use the delegator role to send a document to an intermediary who can then route the document for signature.
June 2022	Configure notifications for events and alerts	Video	Learn about shared events and alert settings that you can configure in Acrobat Sign. Alerts are actions that did not take place in a certain time frame, and Events are actions that have taken place.
June 2022	Advanced account sharing	Video	Learn how to set up advanced account sharing - allowing admins and users to delegate their send, modify, and view permissions.

Experience League events

Experience League events are a great place to learn, interact, and get answers from product experts at Adobe! See [Events](#) on Experience League to stay updated for July 2022.

Updated **July 28, 2022**

Event	Type	Description
Adobe Target	Community Q&A Coffee Break	We'll be joined by Adobe Premier Support Business Consultant Rachel Booth, aka @rbooth115. She'll be signed in to the Adobe Target Community to chat directly with you on this thread about your questions pertaining to her areas of expertise (personalization, optimization, integration). Date: Wednesday, August 3rd @ 8 a.m. PDT - 9 a.m. - Details & registration
Ask the Experts: Datastreams and data prep	Experience League LIVE	In this final of three sessions regarding data collection for the Adobe Experience Cloud, our experts will provide a deeper dive into Adobe's advanced data collection capabilities, including functions like data prep for data collection. At the end of this session, attendees will feel confident with the latest and most powerful features for collecting data from digital experiences Date: July 21 @ 9 a.m. PDT - Details

See [Events](#) on Experience League to stay updated on upcoming events and past episodes.

Adobe System Status

Adobe System Status provides detailed information, status updates, and email notifications about Adobe products and services outage, disruption, and maintenance events. Check it out at status.adobe.com.

For the latest release information, see Adobe System Status [release notes](#).

Experience Cloud - central interface components & administration

Experience Cloud [central UI components](#) include features available on the home page and the persistent product header. These features include user profile settings, preferences, and search. You

can also find help on user and product management, Customer Attributes, and Experience Cloud Audiences.

Provisioning update

IMPORTANT

Please review the following notice regarding Experience Cloud provisioning.

Adobe is updating its provisioning to provide all Experience Cloud customers access to foundational capabilities that aid interoperability between some Experience Cloud products. Users will have Adobe Experience Platform as a new entitlement added to their Experience Cloud organizations, with Data Collection as an included service.

Adobe Experience Platform Data Collection includes tags for simplified universal tag management, and offers a trusted, robust, and complete, streaming data infrastructure. Tags simplify customer experience data collection and streamlines experience delivery.

Changes in Admin Console

Administrators could see changes or additions to the Admin Console as follows:

- The Adobe Experience Platform product card in the Admin Console will include:
 - Places
 - Assurance
 - Identity Namespace
 - Sandboxes
 - Experience Data Model
 - Schemas
 - Datastreams
 - Visitor ID

For organizations that are not currently using Experience Platform, you will now see the *Adobe Experience Platform* product in the Admin Console, including the capabilities listed above.

For organizations currently using Experience Platform, *Places* will now be consolidated into the Experience Platform card.

- Adobe Experience Platform Data Collection (formerly, Launch) and Privacy will continue to appear as separate product cards from the other Experience Platform capabilities.

For more details about the new capabilities, please visit their respective pages on Experience League:

- [Data Collection](#)
- [Places](#)
- [Assurance](#)
- [Identity Namespace](#)
- [Sandboxes](#)
- [Experience Data Model](#)
- [Schemas](#)
- [Datastreams](#)
- [Visitor ID](#)
- [Privacy](#)

Feature update

Feature released: **July 11, 2022**

Feature	Description
Unified Home - Quick Access Widget	<p>Navigate faster: You can now further personalize your home experience and decide which applications are at your fingertips. Use the new pinning feature to select which applications appear front and center on your Quick Access.</p> <p>Stay informed with smart pinning: Your new applications are now easier to find. Newly assigned applications display a <i>New</i> badge and auto-pin to Quick Access.</p>

Experience Manager Sites as a Cloud Service

New features in Sites:

- A [new user interface](#) is now available for content admins and content authors to efficiently manage (take actions such as publish, unpublish, copy, and move), search/filter, and create content fragments for Headless use-cases.
- The new [Table of Contents Component](#) works not only with the Core Components but with all components, automatically rendering table of contents on content pages. And, because it is rendered server-side and fully cached by the dispatcher, it is also efficient to load.

Experience Manager Assets as a Cloud Service

New features in Assets:

- Experience Manager Assets uses Adobe Sensei AI capabilities to now [distinguish between colors in an image and apply those as tags automatically on ingestion](#). These tags enable enhanced Search experience, based on image color composition. You can configure the number of colors, within a range of one to forty, that are tagged to an image so that you can search for images based on those colors later.

Experience Manager Forms as a Cloud Service

New features in Forms:

Wizard to create an Adaptive Form: You can use business user friendly wizard to quickly author Adaptive Forms. The wizard provides a quick tab navigation to easily select pre-configured template, styling, fields, and submission options to create an adaptive form.

Experience Manager as a Cloud Service Foundation

What's new:

As mentioned in the May (2022.5.0) release notes, the "Add tree" option under the replication agent admin screen's Distribute tab was removed. Packages with a tree hierarchy of content should instead be replicated using Manage Publication or the Publish Content Tree workflow.

Cloud Manager

What's New:

- Cloud Manager users can now access useful video tutorials from the Welcome card on the landing page at any time.
- The popover on the Restore Content tab of the environments details page now displays a handy list of git commands allowing the user to view changes locally.

New Experience Manager courses and tutorials

New videos, tutorials, and courses published over the past month.

See the [Workfront releases](#) page for a round-up of the latest information for all products.

Release notes for Adobe Advertising Cloud.

- [New features in Advertising Cloud DSP](#)
- [New features in Advertising Cloud Search](#)

New features in Advertising Cloud DSP

Last updated: July 27, 2022

Feature	Description
Inventory	(July 27 release) Auction Insights is a new troubleshooting tool that allows you to analyze the deal composition of both guaranteed and non-guaranteed private deals. Using data visualizations, this tool shows the trend and relative proportions of values received for key auction attributes within a specific time period.

New features in Advertising Cloud Search

Last updated: August 23, 2022

Feature	Description
Campaigns	<p>(Opt-in beta feature for all advertisers; July 16 release) You can now create and manage Google Ads performance max campaigns, including manually creating asset groups and uploading assets. Links to Google Merchant Center product feeds aren't supported.</p> <p>Once you opt in for the beta, you can create campaigns with the Campaign Type "Performance Max" and set up asset groups within the campaign settings. You can also view your existing performance max campaigns, with performance data in table and trend chart format, in the Campaigns view. Campaign-level performance data is also available in reports and in Adobe Analytics (for advertisers with an Analytics integration).</p> <p>To opt in for the beta, contact your Adobe account team.</p>
	<p>Google Ads no longer provides ad-level performance data for standard shopping campaigns, dynamic search ads, or placements.</p>
Campaigns, Advanced Campaign Management, Reports	<p>(July 16 release) (Google Ads and Microsoft Advertising campaigns) The following support is now available for responsive search ads:</p> <ul style="list-style-type: none"> • The Ads view now shows previews of responsive search ads. • (Since June 20) You can now create dynamic responsive search ad variations using a search engine-specific ad template, based on the contents of your inventory, from Campaigns > Advanced (ACM). • The Ad Variation Report includes two new custom columns: "Creative Titles," which adds a column for each of the ad's titles ("Creative Title" through "Creative Title15"), and "Descriptions," which adds a column for each of the ad's description rows ("Description1" through "Description4"). When you include these columns, you don't need to include the other Creative Title and Description columns.

Audience Manager

Fixes and improvements in Audience Manager:

Improvement	Description
Validator for target data sources belonging to other companies	<p>Audience Manager released an improvement to the batch data onboarding process. To prevent accidental file and data onboarding into target data sources owned by other partners, Audience Manager has added a mapping requirement between partner ID (PID) and the data sources (DPID) owned by other partners.</p> <ul style="list-style-type: none"> • See also the <code>_DPID_TARGET_DATA_OWNER</code> field in Amazon S3 name and file size requirements for inbound data files. • Adobe-internal consultants and customer care should read Manage onboarding access for second-party data for information about the new mapping require improvement and how to request a new mapping • It is <i>not</i> required to request a mapping for existing data sharing relationships. The mapping is also <i>not</i> required when onboarding data into target data sources that belong to your PID.

For self-help resources, see [Audience Manager documentation and tutorials](#) on Experience League.

Adobe Experience Manager

New features, fixes, and updates in Experience Manager. Adobe recommends customers with On-Premise deployments to deploy the latest patches to ensure higher stability, security, and performance.

Adobe recommends visiting the [Experience Manager release updates and roadmaps](#) page to stay current on release information.

Product update videos

Watch the [July 2022 Release Overview video](#) for a summary of the features added in the 2022.7.0 (July 2022) release.

- [October 2021 Release Overview video](#)
- [September 2021 Release Overview video](#)

Experience Manager Sites as a Cloud Service

New features

- The [Content Fragment Console](#) now supports [keyboard shortcuts](#).
- Experience Manager as a Cloud Service's [web-optimized image delivery](#) significantly improves page speed by delivering formats such as WebP. This new service also offers more flexible image resizing and transformation options. All versions of the [Core Image Component](#) use this service and lets you deliver images in WebP by selecting an option in the policy of the image component.
- Experience Manager personalization activities can now use experience fragments in lieu of our legacy offers. This feature helps you do the following:
 - Enables a migration path where Experience Manager content promotes Experience Fragment offers rather than legacy library offers to provide appropriately styled content that aligns with the personalization at scale going forward.
 - Prevents content authors from accidentally serving unstyled content on their site.
 - Allows targeting mode of any component to be converted to an Experience Fragment (both JSON and HTML types) which uses editable templates.

Experience Manager Assets as a Cloud Service

New feature available in prerelease channel

- You can now configure Adobe Experience Manager Assets to restrict the type of assets that users can upload based on the MIME type.

Experience Manager Forms as a Cloud Service

New features

- **Keyboard input support for Scribble signatures** - Adaptive Forms are increasingly being used on touch devices, and one common requirement is to support signatures. Signing documents on touch devices has become an accepted way of signing forms. Adaptive Forms has native support for Scribble Signatures and Adobe Sign for such use cases. Now, along with other already supported options, you can also use keyboard to Scribble signatures in an Adaptive Form. It also helps improve accessibility compliance.
- **Use Adaptive Forms wizard in local language** - You can use the wizard in language of your choice. It now supports all the languages supported by Experience Manager.

New features available in prerelease channel

- **Invoke - An Experience Manager Workflow step** - DDX (Document Description XML) is a declarative markup language whose elements represent building blocks of documents. These building blocks include PDF and XDP documents, and other elements such as comments, bookmarks, and styled text. DDX documents are templates for the documents and describe the desired characteristics of source documents that should appear in resultant documents. A single DDX can be used with a range of source documents. You can use the Invoke step an Experience Manager Workflow to perform various operations, like assembling disassembling documents, creating and modifying Acrobat and XFA Forms, and other operations described in DDX Reference documentation.
- **Convert to PDF/A - An Experience Manager Workflow step** - PDF/A is an archival format for long-term preservation of the document's content, all fonts are embedded and the file is uncompressed. Now, you can use the Convert to PDF/A step an AEM Workflow to convert your documents or files in any format to PDF/A format.

Experience Manager as a Cloud Service Foundation

New features

- The Repository Browser now has a path input field, making it possible to jump directly to a specific folder in the repository hierarchy

- SCD (Sling Content Distribution) now supports an explicit “invalidation” action in order to invalidate content without that content being published. Refer to the [Caching in Experience Manager as a Cloud Service](#) page for further details.
- `mod_macro` is now available in Experience Manager as a Cloud Service. [See this table](#) for a list of supported Apache modules.

Enhancements to Experience Manager as a Cloud Service SDK Dispatcher Tools

- Apache can be started with `update_sdk.sh` script, which automatically loads and validates any subsequent changes to Apache and Dispatcher configuration, thus improving developer velocity. Only supported for Dispatcher tools flexible mode. Also, see [Debugging your Apache and Dispatcher configuration](#) for additional details about automatic loading and validation.
- Local Apache/Dispatcher configuration more closely tracks changes in cloud environments, increasing parity between the two environments.

New feature available in prerelease channel

- Experience Manager as a Cloud Service is now integrated with Unified Shell to improve the user experience and unify it with all the other Experience Cloud applications. See [Experience Manager as a Cloud Service on Unified Shell](#).

Cloud Manager

New features

- Cloud Manager users can now access useful video tutorials from the **Welcome** card on the landing page.
- The pop-up on the [Restore Content](#) tab of the environments details page now displays a handy list of git commands allowing the user to view changes locally.

Adobe Learning Manager Connectors

New feature

- The new Adobe Learning Manager has connectors to Adobe Experience Manager Sites, Marketo Engage and Adobe Commerce. See the [Adobe Learning Manager User Guide](#).

Community

- Experience Manager as a Cloud Service [2022.7.0 release update](#).
- Finally! All the Experience Manager content you need in one place on [Experience Manager Community!](#)
- Adobe Experience Manager [Community Lens 1st Edition](#), August 2022.

- [December 2021 Release Overview video](#)
- [October 2021 Release Overview video](#)

- [September 2021 Release Overview video](#)

Experience Manager Assets as a Cloud Service

New features

- When sharing digital assets as a link, the users can copy the URL to clipboard right away. The enhancement lets you share assets in a faster and more convenient way. This functionality allows for faster and convenient asset sharing.
- When you upload TXT files, the asset microservices automatically generates a thumbnail. The PNG thumbnail is a rendition of TXT file that helps users identify the contents or the files to some extent, without opening the files. This functionality does not require any configuration and works by default.

New feature available in prerelease channel

- Users can now sort the assets displayed in the search results in Column and Card views. The sorting works on Name, Created, Modified, or None columns.

Experience Manager Forms as a Cloud Service

New features

- AEM Archetype project for Forms as a Cloud Service now includes [form data models for Microsoft® Dynamics and Salesforce.com](#).
- Acroform-based Document of Record: Experience Manager Forms as a Cloud Service supports using [Adobe Acrobat Form PDF \(Acroform PDF\)](#) as a template for Document of Record besides XFA-based form template.
- Microsoft® Azure data store connector: You can now [connect Form Data Model to Microsoft® Azure storage](#). It lets you retrieve and store adaptive form data to Microsoft® Azure storage as a BLOB.

Beta features of Forms

- **Unified Storage Connector** - Use Unified Storage Connector to externalize in-process data in customer-managed repositories. For example, you can
 - Enable Forms Portal's save and resume functionality and store adaptive forms drafts in a customer-managed data repository.

- Store in-process Experience Manager Workflows data (Experience Manager Workflow Variables data) that contains Sensitive Personal Data (SPD) in a customer-managed repository.
- **Experience Manager Forms as a Cloud Service, Communications - [Communication APIs](#)** help you combine XDP templates and XML data to generate print documents in various formats. The service allows you to generate documents in synchronous mode. The APIs enables you to create applications that let you:
 - Generate documents by populating template files with XML data.
 - Generate output forms in various formats, including non-interactive PDF print streams.
 - Generate print PDF files from an XFA form PDF and Adobe Acrobat Form.You can write to formscsbeta@adobe.com to sign up for the beta program.

New features available in prerelease channel

- **Use Adobe Sign roles in an Adaptive Form** - Adobe Sign for business and enterprise service levels can optionally expand the roles for Agreement recipients beyond just the Signer, to better match their workflow requirements. You can now [enable each recipient of agreement to configure their role in an Adaptive Form](#), with Signer being the default role.
- **Analytics for Adaptive Forms** - You can now capture and track end user behavior via Adobe Analytics for Adaptive Forms to gather end user insights. It helps make informed decisions that are based on data to improve end user experience.
- **Easily connect Experience Manager Forms with Microsoft® Dynamics and Salesforce.com** - The service provides out-of-the-box data source configuration and data models for Microsoft® Dynamics and [Salesforce.com](#). This ability makes it [faster and easier for developers to configure Microsoft® Dynamics 365 and Salesforce cloud services for an adaptive form](#).

Experience Manager Screens as a Cloud Service

New features

- Screens as a Cloud Service now supports basic playback monitoring. The player now reports various playback metrics with each ping (default is 30 seconds). Based on the metrics, it can detect various edge cases (stuck experience, blank screen, scheduling problem, and so on). This feature lets the team remotely monitor if a player is properly playing content. It also improves reactivity to blank screens or broken experiences in the field, and decreases the risk of showing a broken experience to the end user. See [Basic Playback Monitoring](#) for more details.

- Thumbnail Support for videos is now supported in Screens as a Cloud Service. A content author can define a thumbnail for videos so that the image is used as a placeholder. They can properly test content playback and targeting, while the actual video is being finalized by the appropriate team. The image can also be used, in case the playback of the video fails. See [Thumbnail Support for Videos](#) for more details.

Cloud Manager

New features

- The version of the AEM Archetype project used by Cloud Manager is now updated to version 30.
- The program cards on the Cloud Manager landing page and the associated experience are now refreshed.
- The Code Quality Step Log now includes verbose logging information on the OakPal scanning process.
- The Activity page menu options now include an option to Download Log for completed Code Generator executions. Selecting this downloads the log of the build step.
- Clicking directly on the Program card now navigates to Cloud Manager Overview page.
- Cloud Service customers can now view SLA (Service Level Agreement) reports in Cloud Manager. This feature is being made available progressively over the next few months. See [SLA Reporting](#) to learn more.
- The type and severity of the IndexType and IndexDamAssetLucene quality rules has been changed. These are now both Bugs of Blocker severity.
- New Oak index quality rules have been introduced to cover asynchronous and Tika configurations.
- Increase max SSL certs per program to 50.
- Self-service capability to let users create and manage multiple repositories by way of the Cloud Manager user interface.
- SonarQube was unnecessarily reading Git history data. On large code bases, this could lead to an unnecessary build performance penalty.
- There is now an API available to invalidate the Maven dependency cache per pipeline.

- The version of the AEM Archetype project used by Cloud Manager is now updated to version 29.

Community

- AEM as a Cloud Service 2022.7.0 - [Release update](#).

Campaigns	<p>(Google Ads accounts; beta feature) You can now create and manage Google Ads performance max campaigns, which show and optimize conversions for your ads across channels using Google Ads smart bidding, using the Campaign Type "Performance Max."</p>

Feature	Description
	<p>(Google Ads accounts) The Campaigns > Ads view now includes an optional Ad Strength column, which indicates how well each responsive search ad (RSA) follows Google Ads best practices for performance.</p> <p>Microsoft® Advertising doesn't yet enable similar support via their API.</p>
	<p>(Microsoft® Advertising accounts) Synchronization, read-only, and reporting (including view-through data) support are now available for your existing native ad campaigns on the Microsoft® Audience Network, including those with Microsoft® audience ads.</p>
Campaigns, Reports	<p>More publisher impression share metrics become available in the following weeks as columns in the campaign management views and reports.</p>
Conversion Value Rules	<p>(Google Ads accounts; beta feature) You can now view your existing conversion value rules from Optimization > Conversion Value Rules. Advertisers with Google Ads conversion tracking at the individual account level or lower can also create and manage rules.</p>
Portfolios	<p>(Opt-in beta feature; Google Ads accounts) YouTube campaigns with the Maximize Conversions bid strategy in hybrid portfolios are now included in custom simulation results. The hybrid portfolio must include only YouTube campaigns.</p> <p>To participate in the beta program, contact your account team.</p>
Advertising Insights	<p>The Advertising Insights view has a new look and workflow, based on a new infrastructure that improves performance and reliability. Now, just click an insight name, select or enter the settings, and then click Generate Insight.</p> <p>To temporarily return to the legacy view, enable Switch to old UI in the upper right. The legacy view will be removed at the end of September.</p>
	<p>The Query Cross Matching Beta analysis is now available.</p>

Feature	Description
Reports	<p>(Google Ads accounts only) The new specialty report RSA Assets Report shows impression metrics for each asset (Creative Title or Description) for the responsive search ads (RSAs) in one or more portfolios or one or more accounts, campaigns, and ad groups. By default, data includes one row for each asset that received at least one impression in the specified data range, even if the asset was disabled (removed) during the reporting period. Note: When you select the option to “Include rows with no performance data,” the data still won’t include data for assets that have never received data.</p>
	<p>Additional support for responsive search ads (RSA) is available in the Ad Variation Report:</p> <p>(Google Ads accounts only) In the Columns settings, a new “Ad Strength” column indicates how well the RSA follows Google Ads best practices for performance. The same column is available in the Campaigns > Ads view. Microsoft® Advertising doesn’t yet enable similar support via their API.</p> <ul style="list-style-type: none">• In the Columns settings, you can sort the report results by Creative Titles and by Descriptions.• In the Advanced Filters settings, you can filter by the Ad Text field, which applies to both Creative Titles and Descriptions.

Feature	Description
Recommendations	<p>(Google Ads accounts; beta feature) Within Insights & Reports > Recommendations Beta, you can:</p> <ul style="list-style-type: none"> • See at a glance all recommendations that haven't been acted on for a Google Ads account. • Apply and dismiss the recommendations for an account. • View logs of each recommendation that was applied for an account. <p>Supported Recommendations:</p> <ul style="list-style-type: none"> • Recommendation Category; Recommendation Type; Description • Ads & extensions; CALL_EXTENSION; Add call extensions to campaign • Ads & extensions; CALLOUT_EXTENSION; Add callout extensions to campaign • Ads & extensions; OPTIMIZE_AD_ROTATION; Use optimized ad rotations • Ads & extensions; RESPONSIVE_SEARCH_AD; Add new responsive search ad • Ads & extensions; RESPONSIVE_SEARCH_AD_ASSET; Add responsive search ad assets to an ad • Ads & extensions; SITELINK_EXTENSION; Add sitelink extensions to campaign • ads & extensions; TEXT_AD; Add ad suggestions • Bidding & budgets; CAMPAIGN BUDGET; Fix campaigns Limited by budget • Bidding & budgets; ENHANCED_CPC_OPT_IN; Bid with Enhanced CPC • Bidding & budgets; FORECASTING_CAMPAIGN BUDGET; Fix campaigns that are expected to become Limited by budget in the future • Bidding & budgets; MARGINAL ROI_CAMPAIGN BUDGET; Adjust campaign budget to increase ROI • Bidding & budgets; MAXIMIZE_CLICKS_OPT_IN; Bid with Maximize Clicks

Feature	Description
	<ul style="list-style-type: none"> Bidding & budgets; MAXIMIZE CONVERSIONS OPT_IN; Bid with Maximize Conversions Bidding & budgets; MOVE_UNUSED_BUDGET; Move unused to constrained budgets Bidding & budgets; TARGET_CPA_OPT_IN; Bid with Target CPA Bidding & budgets; TARGET_ROAS_OPT_IN; Bid with Target ROAS Keywords & targeting; KEYWORD; Add new keywords keywords & targeting; SEARCH_PARTNERS_OPT_IN; Expand reach with Google search partners keywords & targeting; USE_BROAD_MATCH_KEYWORD; Use broad match for conversion-based campaigns with Fully Automated Conversion Based Bidding
Import Campaigns	(Beta feature) You can import your Google Display Network campaigns, including ad images, into Microsoft® Advertising audience campaigns on the Microsoft® Audience Network from Tools > Import Campaigns. Once you import campaigns, you can check the status of your import job, review any error logs, and edit, pause, or delete your import schedule.

Adobe Document Cloud

New tutorials and courses published for Adobe Document Cloud, including Document Services and Acrobat Sign.

Published	Name	Type	Description	Application
September 2022	Auto-adjust layout	Video	Learn about the new editing mode that reflows content and auto-adjusts the layout across pages in your PDF.	Acrobat

Published	Name	Type	Description	Application
September 2022	Add custom page	Video	Learn how to add custom pages to your PDF using the integrated Adobe Express app, which offers thousands of templates to choose from.	Acrobat
September 2022	Modify an existing web form	Video	Learn how to disable, edit, and re-enable an existing web form.	Acrobat Sign
September 2022	Creating a report	Video	Learn how to build your own reports to gain visibility into your document signing process, or see how individual groups or users are doing.	Acrobat Sign
September 2022	Creating a report chart	Video (updated)	Learn how to build, save, and manage your own custom reports and data exports in a personalized view with the new reporting experience.	Acrobat Sign
September 2022	Building a custom workflow	Video (updated)	Learn how to tailor and automate document workflows to get electronic signatures, collect form data, and confirm delivery of an important document to streamline workflow management.	Acrobat Sign
September 2022	Send for signature in Microsoft Teams	Video (updated)	Learn how to send agreements for signature, check the status of agreements, and send reminders all from within Microsoft Teams.	Acrobat Sign

Published	Name	Type	Description	Application
September 2022	Adding fields to your documents	Video (updated)	Learn how to automatically place fields on your document or use the drag-and-drop authoring environment inside Acrobat Sign.	Acrobat Sign
September 2022	Configure sending options	Video (updated)	Learn how to configure various options when sending out a document for signature.	Acrobat Sign

Streaming Media Analytics

- Streaming Media Analytics [release notes](#)
- Streaming Media Analytics [product documentation and tutorials](#)

Audience Manager

Not updated

For self-help resources, see [Audience Manager documentation and tutorials](#) on Experience League.

Adobe Experience Manager

New features, fixes, and updates in Experience Manager. Adobe recommends customers with On-Premise deployments to deploy the latest patches to ensure higher stability, security, and performance.

AEM roadmaps and release videos

Adobe recommends visiting the following resources to stay updated on release information:

- [Experience Manager release updates and roadmaps](#) - Learn about the Experience Manager releases roadmap, previous release updates, and documentation updates.
- [Experience Manager as a Cloud Service release updates](#) - Get a quick overview of the latest features on Adobe Experience Manager as a Cloud Service.

Experience Manager Sites as a Cloud Service

New features in AEM Sites

The Email component allows the creation of content in AEM that is then delivered as emails via Campaign Classic. The Core Email Component:

- Is based on the [Core WCM Component](#) which supports Editable Templates and the Style System.
- Provides ten email-optimized production-ready components (Page, Container, Title, Text, Image, Button, Teaser, Experience Fragment, Content Fragment, Segmentation).
- Provides advanced personalization and segmentation, thanks to the [insertion of Campaign variables](#) on most dialog fields, and to the flexible [Segmentation component](#).
- Provides optimal email-friendly HTML output, thanks to the [CSS styles inliner](#), the [HTML attribute inliner](#), and the [HTML sanitizer](#).
- Allows the creation of the emails anywhere.

New features available in Sites prerelease channel

- The [Content Fragment Console](#) provides users with an option to display the total number of language copies associated with a content fragment. A one-click access has been provided to view all the language copies as well. Users are also able to filter the table view by the locale of their interest.

Experience Manager Assets as a Cloud Service

New features in Assets

- You can now configure Adobe Experience Manager Assets to restrict the type of assets that users can upload based on the MIME type.

Experience Manager Forms as a Cloud Service

New features

Adaptive Forms wizard: AEM Forms provides business user friendly wizard to quickly author Adaptive Forms. The wizard has a quick tab navigation to easily select pre-configured template, styling, fields, and submission options to create an adaptive form. This release brings following improvements to the wizard:

- **Select or deselect fields**: The wizard allows you to create an Adaptive Form based on JSON and Form Data Model schemas. You can now select subset of fields within a schema to include in an Adaptive Form. The selected fields are converted to corresponding Adaptive Form data capture components to quickly create the desired adaptive forms.
- **Use Static Templates**: Customers with existing investments in legacy static templates can continue their journey of cloud adoption by using static templates in wizard to author adaptive forms. This provides additional time to customers to migrate old static templates to modern editable templates.
- Remove hidden fields from a Document of Record (DoR) while server-side processing: You can generate the document of record PDF for end users containing only those fields which were visible to them during data capture experience. Upon form submission, the server validates which fields were hidden to the end user based on submitted data and excludes from document of record for consistency.

Cloud Manager

- AEM Guides can now be configured in a self-service manner on Sandbox programs.
- Customers without any Cloud Manager role cannot access program details. They can however, navigate to Author end points from Cloud Manager landing pages.
- Customers can set up **Incident and Proactive notification** groups to hear from Adobe about incidents or recommendations related to their AEMaaS application. See User Group for Notifications for more details.
- **Add Program Affordance** in the UI consistently provides tool tips when it is disabled due to permission or entitlement related reasons.

Workfront for Experience Manager enhanced connector

The latest version (1.9.3) of Workfront for Experience Manager enhanced connector was made available on **September 16, 2022**. See [Release Notes](#) for more information.

Adobe recommends you to [upgrade to the latest 1.9.3 version](#) of the Workfront for Experience Manager enhanced connector.

New Experience Manager courses and tutorials

New videos, tutorials, and courses published over the past month.

Published	Name	Type	Description	Applications
October 2022	Item Load Property in AEM Forms	Video	Learn how to configure and populate drop down list using the item load path property.	AEM Forms CS
October 2022	Enable front-end pipeline for standard AEM project Archetype	Video	Learn how to enable the AEM WKND Sites Project using AEM Project Archetype to deploy front-end resources such as CSS, JavaScript, fonts, and icons, using a front-end pipeline for a faster development-to-deployment cycle.	AEM Sites
October 2022	Next.js App	Video	Learn how to query content using AEM's GraphQL APIs using persisted queries. The AEM Headless Client for JavaScript is used to execute the GraphQL persisted queries that power the app.	AEM Sites

Last updated: October 6, 2022

Feature	Description
Campaigns	(October 6 release) New pacing-related metric columns are available for the Campaigns views: "Yesterday's OTS" (on target spend), "Yesterday's delivery," "Yesterday's goal," "Today's OTS" (on target spend), "Today's delivery," and "Today's Goal."

New features in Advertising Cloud Search

Last updated: October 14, 2022 for October 15 release

Feature	Description
Portfolios, Campaigns	<p>(Opt-in beta feature) A new “Network Spend Constraints” option allows you to define limits on the budget allocations for specific ad networks in multi-network portfolios. The option is available for portfolios with daily, weekly, and monthly spend strategies, and only when the “Enable campaign max spend target %” option isn’t enabled. When the “Auto adjust campaign budget limits” option is selected, the constraints work within the values configured for the multiple and minimum campaign budget settings.</p> <p>A new Network Constraint Report in Basic Reports shows all specified minimum and maximum search engine budgets as well as the actual spend (cost) for your portfolios.</p> <p>To participate in the beta program, contact your account team.</p>
Campaigns, Bulksheets, Reports	<p>(Beta feature for Microsoft Advertising accounts) The following support is now available for campaigns on the Microsoft Audience Network:</p> <ul style="list-style-type: none"> • You can now create, edit, and change the status of audience campaigns (campaign type “Audience (image)” or “Audience (feed)”), ad groups (ad group type “Audience”), and ads (creative type “Responsive Ad”) from the Campaigns views and using bulksheets. • You can view your existing audience campaigns, with performance data in table and trend chart format, in the Campaigns view. Ad-level performance data is also available in reports and in Adobe Analytics (for advertisers with an Analytics integration). <p>Optimization support will be available in a future release.</p>

Feature	Description
	<p>(Beta feature for Microsoft Advertising accounts) You can now create and manage multimedia ads in search campaigns from the Campaigns view and using bulksheets. The ads have the creative type "Multimedia ad."</p> <p>You can include campaigns with multimedia ads in either standard portfolios or hybrid portfolios with any spend strategy except for Target Impression Share (which isn't yet supported in hybrid portfolios).</p> <p>You can view your existing audience campaigns, with performance data in table and trend chart format, in the Campaigns view. Ad-level performance data is also available in reports and in Analytics (for advertisers with an Analytics integration).</p>
Campaigns, Reports	<p>(Beta feature for Google Ads and Microsoft Advertising accounts) Publisher impression share metrics are now available as columns in the following campaign management views and reports:</p> <ul style="list-style-type: none"> • Campaign management views: All campaign entity views except for Ads. Note: Ad-level data isn't available from the ad networks. • Basic Reports: All reports except for the Ad Variation, Campaign Hourly, and Network Constraints reports. Note: Ad-level data isn't available from the ad networks. • Specialty Reports: Adwords and Bing Audience Target, Campaign Daily Impression Share, and Keyword Daily Impression Share reports. <p>Note: Because the Campaign Daily Impression Share and Keyword Daily Impression Share reports are now redundant, they will be removed in a future release. If you use those report types for scheduled reports, templates, or spreadsheet feeds, transition to using the Campaign and Keyword reports instead. In the meantime, some existing metrics are duplicated in those report types.</p>

Feature	Description
Conversion Value Rules	(Google Ads accounts) The Conversion Value Rules view is now out of beta and generally available. Use it to view your existing Google Ads conversion value rules. Advertisers with Google Ads conversion tracking at the individual account level or lower can also create and manage rules.
Advertising Insights	The Impression Share Lost and Query Cross Matching analyses are now out of beta and generally available.
Recommendations	<p>(Google Ads accounts only) The Recommendations feature is now out of beta and generally available.</p> <ul style="list-style-type: none"> • See at a glance all Google Ads recommendations that haven't been acted on for an account. • Apply and dismiss the recommendations for an account. • View logs of each recommendation that was applied for an account.
Import Campaigns	(Beta feature) You can import your Google Ads performance max campaigns, including local inventory ads, into Microsoft Advertising smart shopping campaigns from Tools > Import Campaigns. Once you import campaigns, you can check the status of your import job, review any error logs, and edit, pause, or delete your import schedule.

Adobe Document Cloud

New tutorials and courses published for Adobe Document Cloud, including Document Services and Acrobat Sign.

Published	Name	Type	Description	Application
October 2022	Scan anything to PDF	Video	Learn how to turn any paper document into a PDF using the free Adobe Scan mobile app.	Acrobat
October 2022	Organize pages	Updated video	Learn how to rearrange pages just the way you like—all in a matter of seconds. Insert, replace, split, reorder, rotate, and even extract discontinuous pages to create a professional-looking PDF.	Acrobat
October 2022	Work with files from Dropbox	Video	Learn how to open, create, edit, sign, and save changes to your Dropbox files from inside Acrobat.	Acrobat
October 2022	Auto archive files in SharePoint with Power Automate	Video	Learn how to automatically archive signed documents to a SharePoint library using Power Automate.	Acrobat Sign
October 2022	Setting up Data Mapping in Salesforce	Video	Learn how to set up data mapping for Acrobat Sign in Salesforce. Data Mapping allows you to pull data back into Salesforce after an agreement has been signed.	Acrobat Sign
October 2022	Set up an external archive	Video	Learn how to create an external archive for backup copies of agreements that have been signed.	Acrobat Sign

Published	Name	Type	Description	Application
October 2022	Manage & track your agreements	Updated video	Learn how to manage and track documents sent for signature in Acrobat Sign.	Acrobat Sign
October 2022	Set up Merge Mapping in Salesforce	Updated video	Learn how to merge data from Salesforce directly into an Acrobat Sign document.	Acrobat Sign
October 2022	Document Builder for Salesforce	Video	Learn how to create a reusable document template using Document Builder for Salesforce.	Acrobat Sign
October 2022	Managing web form data	Video	Learn how to track, manage, and export data from a web form.	Acrobat Sign
October 2022	Liquid Mode in Acrobat Sign	Video	Learn how Liquid Mode improves the mobile signing experience. No more pinching and zooming while trying to read and sign documents.	Acrobat Sign
September 2022	Signing up for a Developer Account	Video	In part 1 of the <i>Acrobat Sign Embed Quick Start Guide</i> , learn how to sign up for an Acrobat Sign API Developer Account. Your new Developer Account is fully enabled with Sign and API functionality.	Document Services
September 2022	Creating your application	Video	In part 2 of the <i>Acrobat Sign Embed Quick Start Guide</i> , learn how to create an application using the Acrobat Sign API.	Document Services

Published	Name	Type	Description	Application
September 2022	Creating an embed link	Video	In part 3 of the <i>Acrobat Sign Embed Quick Start Guide</i> , learn how to create an embed link for OAuth. Your application gets permissions for users using this OAuth method.	Document Services
September 2022	Generating an access token	Video	In part 4 of the <i>Acrobat Sign Embed Quick Start Guide</i> , learn how to generate an access token that can be used with the Acrobat Sign API.	Document Services
September 2022	Creating a transient document	Video	In part 5 of the <i>Acrobat Sign Embed Quick Start Guide</i> , learn how to create a transient document.	Document Services
September 2022	Auto-adjust layout	Video	Learn about the new editing mode that reflows content and auto-adjusts the layout across pages in your PDF.	Acrobat
September 2022	Add custom page	Video	Learn how to add custom pages to your PDF using the integrated Adobe Express app, which offers thousands of templates to choose from.	Acrobat
September 2022	Modify an existing web form	Video	Learn how to disable, edit, and re-enable an existing web form.	Acrobat Sign

Published	Name	Type	Description	Application
September 2022	Creating a report	Video	Learn how to build your own reports to gain visibility into your document signing process, or see how individual groups or users are doing.	Acrobat Sign
